BASE BID DESCRIPTION:

The Safety Building is a six story steel frame structure with a poured in place concrete pan and joist system. The exterior wall is constructed of cut limestone panels with masonry backup. The main objective of the work in Contract is to repair the deteriorated perimeter parapet of the main roof by rebuilding the parapet's masonry up. The CJF is a eleven story bldg with pedestrian bridge to the MC CH and SB. The exterior facade is clad with cut limestone panels from the 1st floor through the 3rd floor and floors 4 through 11 are clad with matching architectural precase concrete panels. The existing sealant joint between the panels has deteriorated and is in need of replacement.

The DBD Department concurs with the DBE participation for the above recommended Bid. Please refer to the approved Form DBD-014C attached to the bid recommendation.
