Alcohol & Other Drug Abuse Services: Core Values

In 1999, as a response to the large number of families who were involved in the welfare reform, child welfare, and AODA/Mental Health Treatment systems, the Wisconsin Department of Health and Family Services (DHFS) and the Wisconsin Department of Workforce Development (DWD), in collaboration with the Milwaukee County Department of Human and Services (DHS), launched the Milwaukee Family Services Coordination Initiative (MFSCI). The impetus for the year-long (October 1, 1999 – September 30, 2000) Initiative was the realization that the multiple needs of these families were not being adequately addressed, at least in part due to the lack of coordination among the systems with which they were involved (The Management Group, 2000). The intent of MFSCI was to fundamentally transform the manner in which services have traditionally been delivered by reducing barriers for families involved in multiple systems. The premise of the Initiative was that outcomes for families could be improved through cross-system coordination, provision of wraparound philosophy of care and services, development of networks of formal and informal supports, utilizing a family centered, strength-based, gender/culturally-responsive approach.

The Steering Committee for the project included clients, representative from the Governor's Office, key administrators from DHFS, DWD, the Department of Corrections, and the Medicaid HMOs; the Director of Milwaukee County DHS; and the Milwaukee County Board Chair. The Initiative outlined a set of **core values**, developed through a series of focus groups that included participation by clients, and system representatives at various levels of authority to use as guidelines for service delivery for families and to promote improved outcomes. BHD has adopted these core values.

A. **Family-Centered:** A family-centered approach means that families are a family of choice defined by the clients themselves. A family may include extended family members, significant others, or persons who function as natural supports in the context of that family. A family may include a non-custodial parent. Families are treated with dignity and respect, regarded as a resource in the treatment process, assisted to build on identified strengths to enhance control and independence, and valued as participants in all aspects of planning and evaluating the service delivery process. The goal of a family-centered team and system is to move away from the focus of a single client represented in systems, to a focus on the functioning, safety, and well being of the family as a whole.

B. **Client Involvement:** The client's involvement in the process is empowering and increases the likelihood of cooperation, ownership, and success. Clients and their families are viewed as full and meaningful partners in all aspects of the decision making process affecting their lives including decisions made about their service plans.

C. **Builds on Natural and Community Supports:** Recognizes and utilizes all resources in our communities creatively and flexibly, including formal and informal supports and service systems. Every attempt should be made to include the client's family, relatives, neighbors, friends, faith community, co-workers or anyone the client would like to include in the team process. Ultimately families will be empowered and have developed a network of informal, natural, and community supports so that formal system involvement is reduced or not needed at all.

D. Strength-Based: Strength-based planning builds on the clients and their families unique qualities and identified strengths that can then be used to support strategies to meet their needs. Strengths should also be found in clients' environment through their informal support networks as well as in attitudes, values, skills, abilities, preferences and aspirations. Strengths are expected to emerge, be clarified and change over time as clients and families' initial needs are met and new needs emerge with strategies discussed and implemented.

E. Unconditional Care: Means that we care for clients and their families, not that we will care "if." It means that it is the responsibility of the Recovery Team to adapt to the needs of the client - not of the client to adapt to the needs of a program. We will coordinate services and supports for the client and family that we would hope would be done for us. If difficulties arise, the individualized services and supports change to meet the needs of clients and their families.

F. Collaboration Across Systems: An interactive process in which people with diverse expertise, along with clients and their families, generate solutions to mutually defined needs and goals building on identified strengths. All systems working with the client have an understanding of each other's programs and a commitment and willingness to work together to assist the clients and their families to obtain their goals. The substance abuse, mental health, child welfare, and other identified systems collaborate and coordinate a single system of care for families involved within their services.

G. Team Approach Across Agencies: A Recovery Team consists of a group of people, in addition to the client, who represent a blend of formal and informal resources (professionals and other) who make up the client/family support network. The team functions with the client and family in an interactive process to develop a plan, based on client/family strengths, values and preferences that will lead to favorable outcomes. Planning, decision-making, and strategies rely on the strengths, skills, mutual respect, creativity, and flexible resources of the team members.

H. Ensuring Safety: When child protective services are involved, the team will maintain a focus on child safety. Consideration will be given to whether the identified threats to safety are still in effect, whether the child is being kept safe by the least intrusive means possible, and whether the safety services in place are effectively controlling those threats. When safety concerns are present, a primary goal of the family team is the protection of citizens from crime and the fear of crime. The presence of individuals who are potentially dangerous requires that protection and supervision be sufficiently effective to dispel the fears of the public.

I. Gender/Age/Culturally Responsive Treatment: Services reflect an understanding of the issues specific to each client's cultural background, gender, age, disability, race, ethnicity, and sexual orientation and reflect support, acceptance, and understanding of cultural and lifestyle diversity. These understandings are then incorporated into the programming. Programs for women must include specific components that address their issues and reflect current research indicating effective treatment components for women, i.e., to include, but not limited to: victimization histories, domestic violence/relationship dynamics, parenting, self-esteem, and educational needs.

Alcohol & Other Drug Abuse Services: Core Values (cont'd)

- J. Self-sufficiency: Individuals and families will be supported in achieving self-sufficiency in essential life domains, to include family, social, educational, vocational, financial, housing, financial, psychological, emotional and spiritual domains.
- K. Education and Work Focus: Dedication to positive, immediate, and consistent education, employment, and/or employment-related activities which results in resiliency and self-sufficiency, improved quality of life for self, family, and the community. BHD clients who also participate in W-2 should have their AODA treatment indicated on their Employability Plan (EP).
- L. Belief in Growth, Learning and Recovery: Client and family improvement begins by integrating formal and informal supports that instill hope and are dedicated to interacting with individuals with compassion, dignity, and respect. Team members operate from a belief that every client and their family desire change and can take steps toward attaining a productive and self-sufficient life.
- M. Outcome-oriented: From the onset of the family team meetings, levels of personal responsibility and accountability for all team members, both formal and informal supports are discussed, agreed-upon, and maintained. Identified outcomes are understood and shared by all team members. Legal, education, employment, child-safety, and other applicable mandates are considered in developing outcomes, progress is monitored and each team member participates in defining success. Selected outcomes are standardized, measurable, based on the life of the family and its individual members.

AODA Program Goals

- (1) To achieve improved outcomes by meeting the special needs of eligible individuals and families who experience problems resulting from alcohol or other drug abuse by providing intervention, treatment, and support services that are gender and culturally responsive.
- (2) To target eligible individuals and families who may be involved in several systems in order to develop better ways to coordinate services from multiple service systems.
- (3) To ensure the provision of recovery support services including, but not limited to, parent education, vocational and housing assistance, coordination with other community programs, and treatment under intensive care.
- (4) To develop a system that reinforces the empowerment of individuals and their involvement in the planning, design, implementation, and evaluation of the program, as well as their care plan.
- (5) To identify best practices and provide knowledge dissemination activities and cross training and education to professionals who work with individuals and families and are from different systems in order to achieve positive individual/family outcomes.

It is important that, whenever appropriate, each application demonstrate integration of the above principles and practices into all programs and services provided through these purchase of service agreements

Vision Statement – Behavioral Health Division

The Milwaukee County Behavioral Health Division will be a premier system of mental health and alcohol and other drug abuse disorders in the State of Wisconsin. It will ensure that individuals and families who have behavioral health needs strive to function at optimal levels of physical and mental health and that they are full and equal members of the community. As such, the Division shall provide individuals who have behavioral health needs the support and means to pursue success in the ways they choose to live, learn, love, work and play because:

Our vision is for a behavioral health system that recognizes the partnership with clients, providers and the community and the accountability to its stakeholders for the effective development and efficient use of resources.

Our vision is for a recovery oriented behavioral health system that focuses on the rebuilding of full productive lives for children, adults and their families, and supports a full spectrum of services including primary prevention and early intervention.

Our vision is for a behavioral health system that attracts, retains, and supports employees/other service providers who are competent and provide excellent quality, culturally and linguistically relevant behavioral health treatment and support services.

Our vision is for a behavioral health system that acknowledges the abundance and limitations of our human and financial resources and commits to responsible stewardship of its resources.

Our vision is for clients and families to be equal stakeholders in service system governance, planning and delivery.

Our vision is for a behavioral health system where every client has access to strengths-based, individualized and integrated services that promote health and recovery.

Our vision is for a behavioral health system where cultural, ethnic and socioeconomic diversity is valued by providers and clients.

Our vision is for a behavioral health system where strategies to eradicate stigma, including education of clients, family members, providers and the Milwaukee County community, are implemented and effective.

Our vision is for behavioral health services and supports to be community based and not institution based; when residential treatment or hospitalization is accessed, those services will be used as resources and not as placements.

Our vision is for a behavioral health system that can measure its success in the care of children and adults by establishing and producing clear, quantifiable outcomes

documentation requirements indicated in the Fee for Service Agreement and BHD Community Services Branch Quality Assurance Policies and Procedures that exceed those indicated in DHS 75. Providers are expected to familiarize themselves with these requirements, and be in compliance with such. Co-occurring Biomedically Enhanced Residential Treatment Service is equivalent to ASAM Level III.7 Dually Diagnosed Capable Medically Monitored Intensive Inpatient Treatment. It is a residential service that provides a planned regimen of 24-hour professionally directed evaluation, observation, medical monitoring and addiction/co-occurring treatment in an inpatient-type setting. It is appropriate for patients whose subacute biomedical and emotional, behavioral or cognitive problems are so severe that they require inpatient treatment, but who do not need the full resources of an acute care general hospital or a psychiatric hospital. The services of this program are designed to meet the needs of patients who have functional deficits in Dimensions 2 and 3 of the ASAM PPC-2R. For example, Dimension 2 problems could include such comorbid medical problems as poorly controlled hypertension or diabetes or a co-occurring chronic pain disorder that interferes with the patient's ability to engage in a recovery program. Dimension 3 problems would include either a diagnosable comorbid DSM-IV Axis I disorder or symptoms of such a disorder that are subthreshold of diagnostic criteria, but interfere or distract from recovery efforts (for example, anxiety or hypomanic behavior), and thus require the availability of 24-hour nursing and medical interventions. The care is delivered by an interdisciplinary staff of appropriately credentialed treatment professionals, including a physician who is a board certified or eligible Addictionologist. Treatment is specific to substance-related disorders, but the skills of the interdisciplinary team and the availability of support services also can accommodate conjoint treatment of co-occurring subacute biomedical and/or emotional, behavioral or cognitive conditions. Individuals who have a greater severity of illness in Dimensions 2 and/or 3 require use of more intensive staffing patterns and support services. The service is required to be certified under DHS 75.11, and comply with the service description for an ASAM Level III.7 dually diagnosed capable program. This includes, but is not limited to, the following: A physician is available to assess the patient in person within 24 hours of admission and thereafter as medically necessary. Psychiatric services are available through consultation or referral. Such services are available within 8 hours by telephone or 24 hours in person. The facility is staffed 24 hours a day by nursing personnel. A registered nurse conducts an alcohol or other drug-focused nursing assessment at the time of admission. An appropriately credentialed and licensed nurse is responsible for monitoring the patient's progress and for medication administration. Clinical staff is knowledgeable about the biological and psychosocial dimensions of substance dependence and mental disorders and have specialized training in behavior management techniques, and treatment includes clinical and didactic motivational enhancement strategies that are appropriate to the patient's stage of readiness to change. <u>Requirements of Individual Providers:</u> A substance abuse counselor MUST have one of the following certifications from the State of Wisconsin Department of Regulation and Licensing: Substance Abuse Counselor In Training, Substance Abuse Counselor, Clinical Substance Abuse Counselor. A Clinical Supervisor MUST meet one of the following criteria:

<u>Recovery House</u>	2081	\$45.00	Day

Recovery House is a structured recovery environment that provides sufficient stability to prevent or minimize relapse or continued use and continued problem potential. AGENCY PROFILE: Benedict Center Women's Harm Reduction Program specifically works with women who are, or have been, in trouble with the law. We have over 31 years experience working with women and we recognize that women who are involved in the criminal justice system have unique needs that must be addressed so they can permanently move out of the correctional system. We provide a safe, supportive environment in which women can reflect on their past, replenish personal resources, reconnect with family, and rebuild their lives in order to establish themselves as valuable members of their community.

AGENCY PROFILE: Cedar Creek Family Counseling offers a primary treatment program for alcohol and substance abuse consisting of both individual and group therapy sessions. Most clients in the primary program attend one individual and two group sessions per week. After an assessment by an AODA counselor, a plan is developed with specific and measurable goals. The length of the program, depending on the individual's clinical needs, is usually eight to twelve weeks followed by an aftercare program.

Cedar Creek Family Counseling offers an intensive treatment program for clients whose needs are greatest. The intensive treatment program requires a more structured treatment program and, after a comprehensive assessment, is designed for individuals who have failed in prior treatments, need close supervision, and/or are experiencing a dual problem. Most clients in our intensive program would attend group therapy sessions three times a week and individual sessions three to four times per week.

Both primary and intensive treatment programs consist of components related to abuse, addiction, and the recovery process. These components include stress management skills, emotions during recovery, signs and symptoms of chemical abuse, rational emotive behavioral therapy, and medical aspects of dependency. Clients also learn family roles and family dynamics, including co-dependency and relapse prevention skills. Cedar Creek Family Counseling offers a relapse prevention program that teaches a wide variety of relapse prevention skills and techniques.

For clients who have completed an inpatient or primary outpatient program and are in need of continuing support to maintain their recovery, we offer an aftercare program. Aftercare treatment normally involves attending one group or one individual therapy session per week.

Cedar Creek Family Counseling also offers an Intoxicated Driver Program, Cocaine Abuse Treatment, Brief Therapy Treatment Model, Rational Emotive Behavior Therapy Treatment, Education and Awareness Program and, Adolescent Substance Abuse. Group therapy sessions include the physical effects on addiction and recovery, developing self-awareness, strategies for goal attainment, and self-valuing. Self-valuing provides an opportunity to look positively at oneself. Clients are given opportunities to clarify their values and consider why they make the selections that they do and how do values influence their choices. Group facilitators often lead discussions regarding the progression of alcohol or substance addiction. The consequences of that usage are discussed along with emotional changes in recovery. Family dynamics, peer interactions, cultural differences, and employment situations are also topics that are encouraged.

AGENCY PROFILE: ARCW's Dennis C. Hill Harm Reduction Center is an Outpatient agency providing substance abuse treatment to adults 18 and over. Priority is given to injection drug users. Mission: The Dennis C. Hill Harm Reduction Center is dedicated to serving the drug using community by offering support and counseling. We teach harm-reduction strategies to prevent HIV (Human Immunodeficiency Virus) infection and help develop positive alternatives to the drug & alcohol-using lifestyle, regardless of ability to pay. Treatment Philosophy: If you are using drugs and it is causing pain for yourself or others, we will support you in working out a treatment plan designed to help you live without chemicals. If you are not ready to commit to abstinence, we will support you in learning how to reduce your risks of HIV infection and other infectious diseases by teaching you harm-reduction techniques. Our unique program offers acupuncture and other guided imagery techniques to help individuals reduce stress, cravings, and withdrawal discomfort. We reduce barriers to treatment by providing bus tickets and parking validation for those who drive. Dennis Hill's AODA programming is not like the traditional abstinence-based treatment programs.

AGENCY PROFILE: Imani is a culturally based AODA program designed to address the sociocultural issues as well as the chemical dependency issues of African American men. Imani will utilize an Afro-Centric approach using a unique, creative, innovative and holistic approach, along with the 12 Steps, to address the special needs of African American men. This approach is spiritually based, provides habilitation in lieu of rehabilitation, and recognizes the difference between those behaviors/attitudes that are dysfunctional and those that are actually cultural. This Afro-Centric approach requires that African-American cultural characteristics be built into all aspects of treatment. The primary goal for each of our residents is total abstinence and an attitudinal change conducive to the development of a spiritually based lifestyle which insures a change of the entire being, i.e. physical, spiritual and mental. Goals also include developing anger management and life-skills, employment readiness, budgeting, etc.

AGENCY PROFILE: Milwaukee Health Service Systems is one of 5 MHSS clinics in the State, specializing in medication assisted treatment of narcotic addictions. There are two clinics in Milwaukee, one in Madison, one in Appleton, and another in Wausau. Since the 1960's, methadone has been used in the successful treatment of narcotic addictions. When used as prescribed, it can halt cravings for street opioids without producing a "high". Proper dosage will prevent withdrawal and can be adjusted throughout the program to maintain patient's ability to function normally while optimally weaning them from the methadone over time. Our goal is to offer a wide range of quality substance abuse treatment.. We believe you can attain an independent constructive lifestyle. Our priority is to stabilize each individual by providing medically monitored treatment, combined with psychosocial rehabilitation services. In our safe and clinically supportive environment, patients can make a positive change in their lives in an atmosphere of dignity and in a therapeutic time frame that is appropriate for each individual. We understand the difficulties of the social stigma associated with being addicted. We believe that opioid dependency is a biochemical disorder that can be arrested with appropriate medication and/or counseling. Our clinic offers comprehensive ambulatory drug and alcohol addiction treatment including drug screening, detoxification for opiate dependencies, polydrug abuse treatment, and individual and group counseling. Program features include: personalized treatment plan, HIV and Hepatitis C education, convenient and flexible hours, vacation dose service, and a comprehensive physical exam. MHSS1 makes every attempt to identify and meet the cultural needs of those seeking/participating in treatment. All staff receives training to ensure they acquire the cultural knowledge and skills needed to provide culturally appropriate treatment of the patient population served. Any individual with limited English language capability barriers shall have equal access to substance abuse services.

AGENCY PROFILE: Funded in 1989, My Home Your Home (MHYM) is an innovative non-profit organization founded with the mission of providing a safe, secure, and supportive environment to at risk youth and young adults of Wisconsin. My Home, Your Home strives to ensure that our staff is as diverse as the population we serve. MHYM has a demonstrated leadership that emphasizes commitment, vision, and results-oriented leadership. Collectively, My Home, Your Home, Inc, has over 100 years of experience in identifying needs, developing a vision of service delivery to support local families and foster children, forming strategic community partnerships, evaluating service quality and compliance, and implementing innovative programming. MHYH strives to provide the best possible services to society's most vulnerable children so that they can strive for happiness, health, and productivity as adults. In response to community needs, MHYH has grown significantly over the past decade. Services offered: Treatment Foster Care, Wrap-Around Care, Lissy's Place, Amad's Place, Placement Stabilization Center, Daily Living Skills and Life Skills Training, House Management Services, Housing Assistance, Parent Assistance, AODA Family Counseling, AODA Individual Counseling. Each of our programs has given us a wealth of understanding regarding the community we serve, particularly their needs and the services and resources that meet those needs. Through the Wraparound care we have gained experience in working with juveniles who enter the program as an alternative to incarcerations. Care Coordinators are responsible for making daily to weekly contacts, depending on the needs of the juveniles on their case load, providing clients and their families with seamless services that aim to prevent further delinquencies and deter placements out of home. Since so many minority youth require intensive services, yet few minority agencies provide them, we were pleased to add this to our menu of programs and expand our continuum of care to best meet the needs of the children we serve. The Treatment Foster Care (TFC) Program has been a cornerstone of our program offerings. TFC began in response to our recognition of the need to find permanent placements for the most challenging population of foster children to place- teens living in residential treatment facilities. The teens in these facilities had little or no hope of returning to their biological families or being adopted and were resigned to living in these facilities until reaching the age of 18, whereupon, they would be discharged from the foster care system and left to fend for themselves. Lissy's Place, our Transitional Housing Program specializes in providing independent living services for young, single, homeless women aged 18 to 21. Some program participants have been in the juvenile justice system, giving us insight into the issues and concerns that can affect them. The goals of the program are to guide participants toward a safe, successful transition to self-sufficiency and assist them in obtaining permanent housing. These goals are achieved through stable housing, an interconnected web of independent living services, and intensive, supportive case management.

AGENCY PROFILE: Our Space was founded in 1988 by people living with a mental illness, their family members, members of the clergy and mental health professionals. Our Space was built on the belief that people who had been sidelined by their mental illness could get their lives back on track by joining an organization whose members (clients) had all "been there." It would be a place that helped people get back on their feet by giving them somewhere they could re-build the basic skills they needed in order to move forward. Every year the members of Our Space elect a Member Management Team. This is a group of eight people who work with the staff to develop the many programs that Our Space provides. The programs at Our Space are designed to help people improve their lives using the tools that have been proven to help them succeed. Our Space employs many of its members to do everything from working at the Blue Dove Gift Shop or the Price is Right Shoppe to assisting in peer mentoring, outreach and janitorial programs. Volunteers from the community form the Board of Directors, the Advisory Committee and assist in running daily programs. New members are encouraged to join one of the many daily programs that Our Space offers. Some of the most popular programs at Our Space include: the Wellness/Exercise Program, Computer Instruction classes, several different support groups and recreation activities such as pool, ping pong and community outings.

Over half of the people that come to Our Space have a "dual-diagnosis," meaning that in addition to their mental illness, they also have a dependency on drugs or alcohol. As a result, programs that address the specific needs of these individuals were created and are now being offered to individuals who have an alcohol or drug abuse problem, but may not have a mental illness. The Parenting Assistance Groups run for ten weeks and helps people improve their parenting skills. Each session focuses on a necessary tool for successful parenting and also includes a special focus on how alcohol or drug abuse can affect parenting. Group and individual instruction is available and the Parenting Coordinator will offer hands on parenting assistance. The Daily Living Skills Program meets in groups as well as on an individual basis and is a 6-week program that provides support and training for everyday practical and financial skills, such as nutrition, personal care, and money-budgeting skills.

People who attend these programs can become a member of Our Space, but are not required to do so. Our Space is located at 525 W. Lincoln Ave., Milwaukee, WI 53207 and our phone number is (414) 383-8921. Our Space is open from 9am until 4pm Monday through Friday with some nighttime and weekend activities.

AGENCY PROFILE: RN was founded in 2003, by Jim Valona, who believed in empowering the less endowed.

Since our inception we have grown from serving the few to now serving the many. In 2004, RN acknowledged the need for AODA services and opened a Day TX/OT PT substance abuse program. Starting out with a skeleton crew, RN now employs over ten professional individuals.

Recognizing the enormous burn out rate of well seasoned counselors, RN built its team with individuals who have the desire and empathy to serve but lacked the credentials. Now proudly all counseling staff at our agency has various credentialing from SAC-IT's to CSAC's. Vigorously empowering our clients through our mission statement, that – It is our belief that with proper motivation, determination, and a lot of hard work we can learn to alter the destructive patters we have developed in our lives. Providing an environment to establish a healthy and holistic relationship with someone unique, yourself!

At RECOVERY NETWORK; we implement AODA education through Motivational Interviewing and the six states of the Developmental Model of Recovery. We also engage our clients in the opportunity to challenge their criminal and addictive thinking through cognitive behavioral group therapy thus breaking the chains and habits and replacing them with ways to apply coping and refusal skills through rational thinking.
