

Wisconsin Home Energy Assistance Program

What Is It? How Does It Work?

Energy Assistance is a one-time payment during the heating season (**October 1—May 15**). The funding pays a portion of energy costs, but the payment is not intended to cover the entire energy costs of a residence. The amount of the energy assistance payment varies depending on a variety of factors, including the household's size, income and energy costs. In most cases the energy assistance benefit is paid directly to the household's energy supplier.
