BASE BID DESCRIPTION:

The work under this contract consists of constructing a centralized deicing ramp facility located at the Runway 7R cargo ramp. Work will include site grading, site utilities, site paving, glycol collection facility which includes trench drains and glycol storage facility construction with access roadway including transmission piping. Electrical work shall include actuator & motor controls for glycol collection, electrical supply, taxiway guidance signage, in pavement & elevated taxiway edge lighting system and related ancillary electrical improvements. Other improvements associated with this project include deice ramp painting, endophyte-enhanced seeding, mulching, sodding, and related site restoration, erosion control and landscaping. Multiple project phasing will be necessary.

CBDP concurs with the DBE participation for the above recommended Bid. Please refer to the approved Form DBD-014C attached to the bid recommendation.
