

Space Planning Study at  
General Mitchell International Airport for  
Milwaukee County Department of Transportation & Public Works

PROJECT NO.: 5041-10022

Milwaukee County Department of Transportation and Public Works is requesting proposals for professional consulting services to provide a Space Planning Study at General Mitchell International Airport for the Department of Transportation and Public Works. It is desired by the Airport Division of DT&PW to relocate several of its functional groups to move to more suitable areas within the confines of GMIA. A professional consultant is required to help develop a plan, its cost and schedule and phased development. The desired relocations need to be complete by 2012. A Space Planning Study shall be performed which will identify the needs and location of each of the functional groups as required. Estimates of the cost shall be provided to allow for budgeting for the new spaces, the cost of the design for those improvements, and for expenses for the moves of each group. Proposals are due December 22, 2010. For further information call Bernard Mielcarek at 414-278-3987 or Mr. Ed Baisch at 414-747-5722.
