INTRODUCTION

The 1998 Recommended Capital Improvements Budget includes 63 separate projects for a total expenditure appropriation of \$81,234,450. Anticipated reimbursement revenue (federal, state and local grants) total \$24,929,167 resulting in net county financing of \$56,305,283.

Appropriations for 58 corporate purpose projects (non-airport projects) total \$61,813,750 with offsetting reimbursement revenues of \$16,898,167. The resulting net county financing of \$44,915,583 is to be financed by \$42,373,523 in general obligation corporate purpose bonds, \$954,800 in miscellaneous revenues, \$1,421,060 in property taxes, \$121,000 in passenger facility charges revenue and \$45,200 in construction fund investment earnings. Recommended expenditure appropriations for 1998 airport capital improvements total \$19,420,700. Airport capital reimbursement revenue appropriations of \$8,031,000 result in a net county financing of \$11,389,700. Net county financing for airport projects includes \$7,448,000 in passenger facility charges revenue, \$3,864,400 in private activity, general obligation or revenue airport bonds, and \$77,300 in construction fund investment earnings.

Since 1982, all airport improvement costs not reimbursed by state or federal agencies have been debt financed using general obligation bonds or financed through pay-as-you-go PFC revenues. Airlines using General Mitchell International Airport have agreed to pay all accrued principal and interest payments on debt issued on behalf of the airport. Debt issued for the airport from 1982 to 1984 is being repaid by the airlines in accordance with a 25 year repayment schedule outlined in the airline lease agreement. Bonds issued after 1984 are repaid by the airlines over the actual term of the issue. Airport bonds issued after 1985 are classified as private activity bonds. These bonds remain tax exempt but income earned from these bonds may be subject to the Alternative Minimum Tax for some taxpayers.

Comparison to 1997 Adopted Budget

The 1997 Adopted Capital Improvements Budget includes 61 projects with a total expenditure appropriation of \$76,416,860. Anticipated reimbursement revenues (federal, state and local grants) total \$17,378,190 resulting in net county financing of \$59,038,670. The general county capital improvement budget (corporate purpose projects) includes 53 projects totaling \$63,826,760 with offsetting reimbursement revenues of \$12,189,190. The resulting net county financing requirement of \$51,637,570 was to be financed by \$48,918,676 in general obligation corporate purpose bonds, \$2,000,000 in miscellaneous revenues, \$556,000 in passenger facility charges revenue, \$57,194 in property taxes and \$105,700 in construction fund investment earnings.

1998 Recommended Expenditure Appropriations by Function

The largest 1998 recommended expenditure category is for transportation and public works related departments. Recommended appropriations total \$34,783,250 for 1998. This amount represents approximately 43 percent of the total recommended capital improvement budget. Major transportation and public works projects include county trunk highway rehabilitation (\$1,199,300), bridge rehabilitation program (\$2,065,000), national highway system improvements (\$5,750,000), bus retrofits (\$2,250,000), continuation of the airport sound mitigation program (\$7,677,000), airport parking facilities (\$3,941,700), school/church sound insulation (\$3,433,000) 7L-25R Runway Extension (\$1,875,000) and rehabilitation of the west FBO apron (\$2,494,000). A large portion of the cost of transportation and public works projects is typically offset with state and federal reimbursement revenues. Recommended transportation and public works related reimbursement revenues total \$20,356,667 for 1998.

The functional area receiving the next largest appropriation is general government. Adopted appropriations total \$26,647,300. Notable recommended project appropriations include additional construction appropriations for a 600-bed men's facility at the House of Correction (\$10,228,500), acquisition of fleet equipment (\$3,000,000), brownfields redevelopment (\$500,000), Marcus Center Chiller Replacement (\$1,050,000), and ABACUS implementation (\$6,600,000).

Recommended appropriations for parks, recreation and culture departments total \$18,064,200. Major projects include Brewer's Stadium infrastructure (\$6,000,000), Cathedral Square renovation (\$1,500,000), parks infrastructure improvements (\$1,557,400) Bender Park improvements (\$5,750,000), and Zoo infrastructure improvements (\$567,000).

Capital appropriations for health and human services departments total \$1,739,700. The most significant project recommended for this functional area for 1998 is an initial \$700,000 appropriation for planning and utility relocation for the demolition of the former Doyme Hospital.

MAJOR 1998 CAPITAL IMPROVEMENT ISSUES

Impact of County Property Tax Rate Limit

Approval of a property tax rate limit for Wisconsin counties has resulted in limits for both operating and debt service purposes. The rate limit is based on the 1992 levy rate adopted for the 1993 budget. The operating levy rate may only be increased if program or service responsibilities are transferred from one governmental unit to another or if a rate increase is approved by public referendum.

The conditions under which the debt service rate may be increased include: approval of issuance of debt at a referendum, adoption of a resolution by the County Board of Supervisors which sets forth its "reasonable expectation" that the issuance of the debt will not result in an increase in the tax rate, actual authorization of the debt prior to the August 12, 1993 effective date of the rate limit, issuance of debt for regional projects as described in Section 67.05(7)(f), Wisconsin Statutes, issuance of debt to refund outstanding municipal obligations, or, adoption of a resolution to issue debt which is approved by a 3/4 vote of the members-elect of the County Board.

The rate limit also prohibits borrowing for "operating expenses." The statute defines operating expenses as "wages, salaries, fringe benefits, materials, supplies, contractual services, equipment with a useful life of less than one year and other costs specified by the department of revenue by rule." Since many expensed or non-capitalized projects are considered to have a useful life of less than one year, debt obligations typically may not be used to finance these projects. The recommended 1998 capital budget does contain some expensed projects (non-capitalized). However, these projects are financed with property tax revenues or proceeds from the sale of the power plant. The tax rate limit applies to all current County managed operations including internal service and enterprise operations which are supported by property taxes. Property tax levy support for these funds is reflected in the general fund.

Department of Public Works (DPW) Staffing/Consultant Plan

Each recommended project write-up on capital budget form 4789 has a detailed staffing plan listed under "Total Project Cost Breakdown". Milwaukee County's General Ordinance for Professional Services 56.30(4) requires that "[f]or projects managed by the department of public works, the department of public works is authorized to enter into contractual services or professional services agreements as may be required for specific capital improvement projects which have been previously approved by county board action." Furthermore, "[t]he budget write-up shall contain specific information as to the scope of the project, professional services required and estimated cost of the professional service work to be performed." Subsequent to budget adoption, DPW prepares a final staffing plan which is reviewed and approved by the County Board. Any subsequent changes to the final 1998 staffing plan will be submitted for review and approval to the County Board of Supervisors during 1998.

Appropriations Based on Cash Flow Needs

The 1998 recommended capital budget is based on cash flow requirements for multi-year projects. The capital improvement budget was developed based on cash flow financing needs due to the establishment of expenditure targets by the federal government for tax exempt debt financed projects. This budgeting practice may result in the approval of multi-year construction contracts for projects which exceed the budgeted appropriation. In these cases, subsequent appropriations may be necessary to complete project financing. In several instances, recommendations for 1998 will result in contractual obligations for 1999 to complete project financing initiated or continued in 1998 or prior years.

PFC Revenues

During 1995, General Mitchell International Airport received authorization to charge a \$3 per person Passenger Facility Charge (PFC) revenue. The 1998 recommended capital improvement budget reflects \$7,569,000 in pay-as-you-go PFC revenues. The airport capital improvement budget reflects \$7,448,000 in PFC revenues. The \$121,000 balance of PFC revenue adopted for 1998 is recorded in the fleet acquisition account as an offset to equipment costs for items being purchased for the airport.

Federal Expenditure Targets for Tax Exempt Bonds

Beginning with 1990 bond issues, the Federal government established expenditure targets for spending tax-exempt municipal bond proceeds. Failure to meet these targets subjects the County to financial penalties totaling 3 percent of the unspent principal amount for each year the target is unmet. If expenditure targets are not met, appropriations for individual projects will be reduced to pay penalty amounts. Expenditure requirements are anticipated for 1998 corporate purpose and airport projects as follows:

6 months	10 percent of proceeds and earnings
12 months	45 percent of proceeds and earnings
18 months	75 percent of proceeds and earnings
24 months	100 percent of proceeds and earnings

A small amount of proceeds are allowed to be spent after 24 months to allow for contract retainage. Project bonds are issued on a reimbursement basis which allows project expenditures to be incurred on January 1 for projects adopted as part of the annual capital improvement budget.

Regulations for Reimbursement Bonds

The Internal Revenue Service (IRS) regulates the issuance of "reimbursement bonds" or bonds issued subsequent to project expenses actually being incurred. Tax-exempt issuers are allowed to pay capital costs out of available cash in anticipation of issuing long-term bond or note financing if certain conditions are met. The County's current practice is to issue capital improvement debt in late spring or early summer. Prior to debt issuance, some expenditures may have already occurred for new projects. This practice subjects the County to regulations for reimbursement bonds. The 1998 recommended budget continues the practice of allowing debt financed expenditures to occur before bonds are actually issued. This practice helps the County to meet expenditure targets for tax exempt bond issues. The following declarations are made for the purpose of complying with the regulations on reimbursement bonds.

1. A summary of recommended 1998 capital improvements identifies specific projects and the amount of the expenditure appropriation to be debt financed. As described above, the County intends to reimburse itself for expenditures made on the debt financed projects with the proceeds of the County's 1998 bond issue(s), the interest on which is to be excludable from the gross income of the owners under section 103 of the Internal Revenue Code of 1986, as amended.
2. The intent of the County is to use unspent bond proceeds from prior year financings or other cash reserves to make advance expenditures for 1998 capital improvements. The temporary expenditure of prior year bond proceeds will be limited to the use category specified when the bonds were originally issued. These proceeds are not available to finance 1998 capital improvements on a long-term basis because they are allocated to other capital improvements. Separate corporate purpose and airport issues may be required. The timing of these issues has not been finalized but based on past experience, bonds may be issued in late spring or early summer.
3. Cash outlays for debt service payments on recommended 1998 bond issues will not be required until 1999. However, proprietary fund departments budget for accrued interest payments during each calendar year. This expense is abated in the County's debt service fund. The County's current budget policy is to dedicate county sales and use tax revenues for debt service payments. To the extent sales and use tax revenues are not sufficient, general tax revenues will be used to meet debt service payments.

Capitalized Interest and Construction Fund Earnings Recorded in Capital Projects Fund

The current interest expense on bonds issued for projects which are under construction is referred to as capitalized interest. Under generally accepted accounting principles (GAAP), the interest cost for proprietary fund departments should be reflected in the construction fund of the project (capital projects fund). The 1998 recommended capital improvement budget includes \$224,300 in appropriation authority to pay capitalized interest costs for a number of proprietary fund projects. In cases where no capitalized interest is charged to the project, operating interest expense is included in the departmental operating budget. Operating interest expense is the interest cost for bonds on projects which are complete or substantially complete and interest costs on equipment acquisition. Interest costs on equipment acquisition is not charged to the project construction fund. Capitalized and operating interest expense is reflected as an abatement to the debt service fund expenditure budget to avoid double counting this expenditure. Net capitalized interest costs will be reduced by construction fund earnings on

unspent bond proceeds. The 1998 recommended budget anticipates \$122,500 in investment earnings on 1998 bonds. These earnings are recorded directly in the capital projects fund as another source of project financing. The capital improvement budget form completed for each project reflects the impact of directly recording both capitalized interest expense and construction fund earnings on project costs.

Requirements for Cash Financing for 1998 Capital Improvements

County policy establishes a minimum pay-as-you-go cash financing requirement for the 1998 capital budget of 14.2 percent of net County financed project costs. Current adopted policy increases minimum cash financing requirements by 2.0 percent annually to a required 20 percent by 2001. Net county financing included in the 1998 recommended budget totals \$56,305,283. Minimum cash required to meet this 14.2 percent cash financing threshold is calculated at \$7,995,351. The 1998 recommended budget includes cash financing of \$10,067,360 which is well above the 14.2 percent cash financing goal at approximately 17.9 percent of net county financing.

Recommended Financing for 1998 Capital Improvements

Recommended financing for 1998 corporate purpose (non-airport) improvements is a combination of federal, state and local government reimbursement revenues, general obligation bonds and notes, proceeds from the sale of the power plant, PFC revenues, property tax revenues and proprietary fund projects construction fund investment earnings. Recommended debt financing for 1998 corporate purpose improvements totals \$42,373,523. This is approximately 69 percent of the total corporate purpose appropriation. The remaining 31 percent of recommended corporate purpose appropriations is cash financed or financed from federal, state or local government reimbursement revenues. Federal, state and local reimbursement revenues total \$16,898,167. Cash financing for 1998 corporate purpose projects includes \$954,800 in proceeds from the sale of the power plant, \$121,000 in PFC revenues, \$1,421,060 in property tax revenues, and \$45,200 in construction fund investment earnings. Recommended airport capital improvement financing for 1998 includes \$8,031,000 in state and federal grants, \$7,448,000 in passenger facility charges revenue, \$3,864,400 in airport bonds, and \$77,300 in construction fund investment earnings.

Recommended debt financing for 1998 will be structured to finance the acquisition of fleet vehicles and personal computers recommended as part of the ABACUS project over a four year period. This recommendation is similar to the actual debt structure used for the 1997 corporate purpose issue. The balance of 1998 recommended debt financed projects will be financed over approximately 16 years.

Although a substantial portion of project costs are financed with long term debt, only a portion of debt service costs may be paid from tax revenues. Debt financing for enterprise fund departments, such as the airports, DHS-Mental Health Division, and mass transit system may be supported in part by operating revenues. This is in contrast to many governmental fund improvements which are wholly tax revenue supported. Debt issued for some enterprise fund departments, such as the airports, has almost no tax levy impact. Collectively, based on 1996 year-end information, bonds issued for County proprietary fund departments comprise approximately 28.5 percent of total general obligations outstanding.

Comparison Charts and Exhibits

A number of charts and exhibits are provided to provide a graphic overview of the 1998 recommended capital improvement budget. Chart One compares the financing breakdown of the five most recent capital budgets with the recommendation for 1998. Charts Two and Three provide a history of actual capital expenditures appropriations for the last 25 years, from 1974 to the 1998 recommended budget. Chart Two compares nominal dollar appropriations. Chart Three compares appropriations after they are adjusted for price level changes. Charts Four and Five compare how appropriations are allocated to functional areas for 1998 recommended and 1997 adopted budgets. Chart six shows outstanding general obligation bonds and notes as of December 31, 1997.

Requested Five Year Capital Improvement Plan (1998-2002)

An indication of the County's future capital needs is contained in the 1998-2002 Five Year Capital Improvement Program. The recommended budget is used for 1998. Future year capital improvement projects for 1999-2002 represent requests from department administrators. Some requests may not ultimately be approved. Compiling a requested five year capital improvement program is a valuable exercise for anticipating the fiscal impact of future capital needs. This information is important for structuring debt issues and scheduling major projects to lessen year to year fluctuations in needed tax revenues but it should be understood that significant changes are possible in departmental priorities and project schedules and costs from one year to the next.

The five year plans shows revenues from federal, state and local governments. The plan also identifies direct tax revenues and required debt financing. For the purpose of preparing the five year plan, investment earnings on the reinvestment of general obligation bonds for proprietary fund departments is reflected as a tax revenue. This classification was selected since the balance of investment earnings (earnings on bonds issued for general fund projects) is treated as an offset to required property tax revenues. It should also be noted that, in some cases, prior year appropriations of state and federal revenues are estimates and may not represent actual experience.

As was discussed earlier, while the overall cost of capital improvements is an important factor, the resulting tax supported cost of proposed improvements is also of importance. Generally, debt financing for enterprise fund departments has a much smaller tax levy effect than most governmental fund improvements because, in many cases, debt service expenditures can be recaptured through charges for service and other revenues.

Outstanding Debt by Department

Based on current borrowing plans, on December 31, 1997, the County will have \$483,945,664 in outstanding general obligation bonds and notes issued for general county purposes. This total excludes \$2,000,000 of outstanding bonds issued by the County on behalf of the Milwaukee Metropolitan Sewerage District. Year end 1997 debt, including debt issued on behalf of the Milwaukee Metropolitan Sewerage District, represents approximately 29.1 percent of the County's \$1,672,105,900 debt limit for 1997. If debt issued on behalf of the District is excluded from this statistic, the percent of legal limit used falls to approximately 28.9 percent. See the 1997 Fiscal Trends Report for a more detailed analysis of the County's outstanding debt. The 1997 Fiscal Trends Report is scheduled for release on November 1, 1997.

Debt Management and Capital Financing Policies

On July 21, 1994, the County Board of Supervisors adopted several debt management and capital financing policies or goals. These policies included a requirement that the County Executive's recommended budget include a summary of the impact that borrowing proposals contained in the recommended budget would have on various measures of debt affordability. As discussed earlier, the policies also established limitations on capital improvement borrowing by requiring an increase in project pay-as-you-go cash financing. The requirement for 1998 is that 14.2 percent of County financed project costs be financed from cash sources.

The following section contains a summary of selected debt affordability indicators and provides a discussion of impacts that 1998 recommended borrowing will have on County debt trends. It should be noted that borrowing totals for corporate purpose projects are not based on the requested five year plan due to the speculative nature of certain capital requests; instead future borrowing amounts of \$40,000,000 are based on limited debt issuance objectives discussed by the County Board of Supervisors.

A number of assumptions were used in the development of future projected debt service costs. Interest rate projections are based on current levels resulting in an approximate rate of 5.25 percent for 15-year level principal payment issues. In addition, growth assumptions used for various expenditure, revenue, equalized property values and other fiscal estimates were projected at 3.5 percent annually. In addition, for purposes of analysis, it was assumed that debt financing for airport improvements in 1999 and subsequent years would be revenue bonds. Therefore, airport borrowing for 1999 and subsequent years has been eliminated from debt affordability projections.

Debt Affordability Indicators

Milwaukee County Debt Management and Capital Financing Policy Goals

1. Tax supported debt service costs shall not exceed actual sales and use tax revenues.
2. Cash financing for capital improvements shall provide for a minimum of 20 percent of County financed project costs. [This goal will be implemented over a ten year period by increasing minimum cash financing by 2.0 percent annually beginning with the 1995 budget.]
3. Direct debt shall not exceed 1.5 percent of equalized property value.
4. Financing terms shall not exceed 16 years for corporate purpose projects and 20 years for airport projects.
5. Average principal maturities shall not exceed 10 years for corporate purpose projects and 12.5 years for airport projects.
6. Net present value savings for proposed advance refundings should total a minimum of 3 percent to 5 percent of refunded principal.
7. Direct debt per capita shall not exceed \$500.
8. Bond insurance will be used when it provides a net economic benefit.

Cash Financing of Capital Improvements

Policy Goal:

Cash financing for capital improvements shall be used for a minimum of 20 percent of County financed project costs. [This goal is to be implemented over a seven year period based on a schedule which requires direct cash financing to increase by 2 percent annually beginning with the 1995 capital improvement budget. Therefore, the required minimum cash financing established for the 1998 recommended capital improvement budget is required to be 14.2 percent of net County financed capital improvement costs.

Definition:

Cash financing (pay-as-you-go financing) of capital improvements means the direct non-debt financing of County financed project costs. It is anticipated that cash financing will be composed almost exclusively of tax revenues; however, cash financing could also include a minor amount of interest earnings realized from the investment of bond proceeds issued for proprietary fund departments. For the purpose of calculating the percentage of cash financing, all project costs financed by state, federal or other local government agencies are excluded from project cost totals.

Trend Information:

Budget Year	Net County Capital Cost	Direct Cash Financing	Percent Cash Financing
2002 Est	50,000,000	10,000,000	20.00%
2001 Est	50,000,000	10,000,000	20.00%
2000 Est	48,899,756	8,899,756	18.20%
1999 Est	47,732,697	7,732,697	16.20%
1998CE	56,305,283	10,067,360	17.88%
1997	59,038,670	6,964,794	11.80%
1996	53,746,000	7,088,700	13.19%
1995	69,316,315	9,504,616	13.71%
1994	47,548,747	2,928,776	6.16%
1993	57,957,632	4,110,913	7.09%

Notes:

Estimated capital expenditures for 1998-2002 result in annual general obligation bond issues of approximately \$40 million. It was assumed that these financings would be structured as 15 level principal payments and would be issued at an interest rate of approximately 5.25 percent. These key assumptions are the basis for subsequent annual debt service estimates used for the following indicators.

The 1997 adopted budget did not meet the adopted cash financing policy goal of 12.2 percent.

Debt Service in Comparison to Sales Tax Revenue

Policy Goal:

Tax supported debt service shall not exceed county sales and use tax revenues.

Definition:

Debt service in comparison to county sales and use tax revenues consists of the amount of principal and interest on direct debt that the County must pay from tax revenues compared to net collections of county sales and use tax revenue. Tax supported debt service excludes interest allocations to proprietary fund departments, metro sewer district debt and other debt service fund revenues. Net collections of sales and use tax revenues exclude discounts withheld by retailers and administrative fees retained by the Wisconsin Department of Revenue. Reported sales tax revenue annual totals are in accordance with generally accepted accounting principles (GAAP). Annual totals reflect March-February monthly receipts.

Trend Information:

Budget Year	Tax Supported Debt Service	County Sales and Use Tax Revenues	Surplus/(Shortfall) in Sales Tax Revenues
2002 Est	59,505,745	58,268,120	(1,237,625)
2001 Est	58,322,660	56,297,700	(2,024,960)
2000 Est	56,171,090	54,393,913	(1,777,177)
1999 Est	55,555,800	52,554,505	(3,001,295)
1998CE	55,364,797	50,777,300	(4,587,497)
1997	50,774,323	49,139,100	(1,635,223)
1996	48,959,807	46,307,064	(2,652,743)
1995	47,684,477	43,675,957	(4,008,520)
1994	42,109,267	45,570,888	3,461,621
1993	38,855,818	42,727,170	3,871,352

Notes:

County sales and use tax collections began in 1991. From 1992-1995 a portion of sales and use tax revenues were dedicated to the payment of net revenue anticipation promissory note interest. Prior to the implementation of the sales and use tax, the County had often established a bond to tax levy ratio to determine direct cash financing totals. With the implementation of the county sales and use tax, surplus revenues were earmarked to finance capital improvement appropriations.

Direct Debt as a Percent of Equalized Value

Policy Goal:

Direct debt shall not exceed 1.5 percent of equalized property value. A long term policy goal is established that direct debt shall not exceed 1.0 percent of equalized property values.

Definition:

Direct debt is the total outstanding principal for general obligation bonds and notes which the County has pledged its full faith, credit and unlimited taxing power. Direct debt does not include debt issued by the County on behalf of the Milwaukee Metropolitan Sewerage District, Revenue Anticipation Promissory Notes or other non-general obligation financings such as capital lease financings or conduit financings issued through non-county agencies. Equalized property value includes the value of Tax Incremental Financing Districts (TID).

Trend Information:

Budget Year	Direct Debt	Equalized Value	Direct Debt as a Percent of Value
2002 Est	460,328,135	39,718,745,580	1.16%
2001 Est	468,959,760	38,375,599,595	1.22%
2000 Est	476,861,028	37,077,874,004	1.29%
1999 Est	482,168,076	35,824,032,855	1.35%
1998CE	486,652,537	34,612,592,130	1.41%
1997	483,945,664	33,442,118,000	1.45%
1996	479,855,674	32,277,814,500	1.49%
1995	477,049,459	31,449,914,500	1.52%
1994	454,199,715	30,049,316,500	1.51%
1993	431,029,715	28,912,452,300	1.49%

Notes:

For the purpose of preparing the trend analysis of direct debt as a percent of equalized value it was projected that equalized property values for January 1, 1998 and subsequent years would increase at an annual rate of 3.5 percent.

Direct Debt Per Capita

Policy Goal:

Direct debt per capita shall not exceed \$500.

Definition:

Direct debt is the total outstanding principal for general obligation bonds and notes which the County has pledged its full faith, credit and unlimited taxing power. Direct debt per capita is determined by dividing direct debt totals by the most recent estimate of the number of persons residing in Milwaukee County.

Trend Information:

Budget Year	Direct Debt	County Population	Direct Debt per Capita
2002 Est	460,328,135	958,408	480
2001 Est	468,959,760	958,408	489
2000 Est	476,861,028	958,408	498
1999 Est	482,168,076	958,408	503
1998CE	486,652,537	958,408	508
1997	483,945,664	958,408	505
1996	479,855,674	963,903	498
1995	477,049,459	965,257	494
1994	454,199,715	969,252	469
1993	431,029,715	967,814	445

Notes:

Direct debt per capita can be used to compare debt levels between issuers or communities but is not a good indicator of real debt burdens over time unless it is adjusted for price level changes. The recommendation to establish this debt policy goal included the caution that this policy must be updated annually to be meaningful and to reflect changes in real price levels. The debt per capita calculation provided for 1998 and subsequent years is based on Wisconsin Department of Administration preliminary population estimates for 1997.

Debt Service as a Percent of Revenues

Policy Goal:

No policy goal established. However, annual monitoring is recommended.

Definition:

Debt service as a percent of revenues consists of the amount of principal and interest that the County must pay on its direct debt as a percent of total governmental and enterprise fund revenues. Governmental and enterprise fund revenues include all County revenues except for internal service fund revenues and reimbursement revenue from the Milwaukee Metropolitan Sewerage District (MMSD) for debt service payments made by the County on behalf of the District.

Budget Year	Debt Service	Governmental and Enterprise Fund Revenues	Debt Service as a Percent of Revenues
2002 Est	73,882,043	991,745,988	7.45%
2001 Est	73,611,889	958,208,684	8.14%
2000 Est	71,337,870	925,805,492	8.02%
1999 Est	70,920,510	894,498,059	8.09%
1998CE	70,427,010	864,249,333	8.27%
1997	69,345,161	797,376,420	8.32%
1996	68,931,457	806,786,000	8.54%
1995	65,428,048	898,815,000	7.28%
1994	57,682,792	907,576,000	6.36%
1993	57,414,023	869,885,000	6.18%

Notes:

For purposes of this analysis it was assumed that governmental and enterprise fund revenues would grow at an annual rate of 3.5 percent. This assumption has been dampened somewhat from previous estimates due to the elimination of John L. Doyme Hospital. This assumed rate is somewhat less than the actual annual rate of increase experienced since 1984. Governmental and Enterprise Fund revenue reflected for 1997 are also estimates and are not based on budgeted appropriations.

1998 RECOMMENDED CAPITAL IMPROVEMENTS MILWAUKEE COUNTY

Division 1201 - County Trunk Highway Action Program

The recommended capital improvement budget provides limited new funding of \$600,000 for 1998 for the County Highway Action Program. The following project elements are authorized to be performed from new appropriations recommended in 1998 and existing appropriations anticipated to be carried over from 1997 for incomplete work elements. This recommendation will result in a contractual obligation for 1999 because permanent project financing for 1998 work elements will need to be provided.

Category 1 - County Highway Action Program (CHAP) Current Commitments

1998 will be the thirteenth year of the County Highway Action Program. This program of projects was initiated in the 1986 budget to expedite the reconstruction of heavily used County Trunk Highway segments which could not be financed under normal highway programs because of limited Federal/State aids. This program recognized the lack of this type of funding by placing the emphasis on a combined County and local municipal agreement for project cost-sharing. The original 1986 program called for a cost-sharing of 50% County, 30% local municipality, and 20% federal aids. The County Board, in 1988, adopted Resolution File No. 88-285 modifying participation to 60% County, 30% local municipal and 10% federal. Under this resolution, the Board also set a priority listing for reconstructing some of the remaining County Trunk Highway segments. This priority listing was extended by the County Board by adoption of Resolution File No. 91-415, which re-prioritized the listing of highway segments for reconstruction.

The adoption of the Intermodal Surface Transportation Efficiency Act (ISTEA) by Congress in 1991 resulted in additional funding participation for eligible projects. The Surface Transportation Program (STP) is the federal funding source. All STP funding when available will be on an 80% federal and 20% local matching basis. The County currently provides one-half (10%) of the local match while the affected municipality (ies) provide the remaining half of the local STP funding match for eligible projects. In 1995, the County Board authorized an appropriation transfer from Org. 1222 to fund the Preliminary Engineering (P.E.) phase of the West Layton Avenue (South 108th Street to South 84th Street) reconstruction project. The project was necessary to provide design work for Highway Design staff through the 1996 and 1997 fiscal years. The P.E. phase of the project is expected to be completed in late 1997. The acquisition of right-of-way (R/W) is anticipated to be performed in early 1998 with construction scheduled to begin in mid-to-late 1998. R/W acquisition is estimated to cost \$345,000. Construction is expected to take place over a two (2) year period. The total estimated cost of roadway and bridge construction is \$6,170,000. Construction costs and right-of-way acquisition will be included in the 1999 capital budget based on contractual commitments anticipated for 1998.

Category 2 - County Highway Action Program (CHAP) Future Project Needs

1. Beginning in early 1998, Highway Design staff will be without a major CHAP design project. The City of Franklin had submitted a request to reconstruct South 76th Street between Terrace Drive and West Puetz Road in 1996. The project was not approved for funding by the County Board in the 1997 budget. Due to the substantial residential growth in the City of Franklin and the need for the County to plan for the reconstruction of the affected County Trunk Highway segments, this segment of South 76th Street (CTH U) is recommended for 1998. Due to the complexity of the project, the preliminary engineering for this segment of roadway is expected to take place over a two and one-half year period (2½ years). Submittal of an application to WisDOT for STP funding was approved by the County Board in 1997. STP funding will provide 80% federal funding while the 20% local match will be comprised of 10% County funds and 10% City of Franklin funds. The City of Franklin has agreed to fund its share of the project costs and will be expected to execute a local share assurance agreement prior to beginning the preliminary engineering work. Preliminary engineering will be performed by DPW staff with the assistance of specialized consultants where required. Preliminary engineering is expected to cost \$1,000,000.

**1998 RECOMMENDED CAPITAL IMPROVEMENTS
MILWAUKEE COUNTY**

Division 1201 - County Trunk Highway Action Plan

2. South 92nd Street, CTH "N" between West Howard Avenue and West Beloit Road has deteriorated at a much higher rate than anticipated. Highway maintenance costs for this segment of roadway is 6 to 7 times higher than for a typical county trunk highway. The City of Milwaukee is in agreement that this section of roadway should be reconstructed. The project is on the priority listing established by the County Board in Resolution No. 91-415. Milwaukee County DPW will submit a CHIP application to WisDOT for this project. CHIP funding will reimburse 50% of the preliminary engineering costs. An agreement will be prepared for execution by the City of Milwaukee for 30% funding. The County's share of the project will be 20%.

Category 3 - County Trunk Highway Permit Review (Annual Costs)

Permit reviews by DPW staff are expected to cost \$150,000 for 1998.

DPW Staffing Plan

Overall project management will be performed by DPW staff. The DPW project manager will be Robert F. Doren. Specialized consultants may be used for some components of the basic planning and design and construction management phases of the project, as needed.

Specialized consultants may be retained for: archeological surveys; soils investigations; material testing; environmental testing; title searches for land acquisition; appraisers for land acquisition; real estate negotiators for land acquisition; special land acquisition litigators with the prior approval of Corporation Counsel; construction surveying; construction inspection; construction management, etc., as required, to complete the planning and design, land acquisition, and construction phases of the project.

MILWAUKEE COUNTY**

Division 1202 - Sixth Street Viaduct Replacement

The 1998 recommended capital improvement budget does not provide an appropriation for this project. However, the release of future appropriations for this project will be contingent upon County approval of project design.

Section 84.11 of the State Statutes provides that local bridge reconstruction projects, if determined to be eligible and necessary, can be undertaken prior to June 30, 1993, with the following apportionment of costs: 75% State, 12.5% County and 12.5% City. In response to a City of Milwaukee petition to undertake the reconstruction of the Sixth Street Viaduct, WisDOT held a public hearing on the subject request and subsequently issued a Finding and Partial Determination as follows:

- [1] The Sixth Street Viaduct project is necessary and eligible for construction under Section 84.11 of the Statutes.
- [2] WisDOT will undertake an investigation in order to issue the final order; to commence preliminary engineering studies to determine the location, character, and kind of bridge most suitable for this location; and to estimate the cost of the project.
- [3] The State will pay 75% of the cost of the investigation with Milwaukee County and the City of Milwaukee each paying 12.5%.
- [4] That upon completion of these investigations, WisDOT will issue a final complete Determination and Order.

WisDOT has delegated authority to the City of Milwaukee to act as lead agency and to undertake the investigation and preliminary engineering studies for the project. An inter-agency cost sharing agreement between the State, the City of Milwaukee and Milwaukee County for Milwaukee County's 12.5% share of project costs was executed in October, 1991 in accordance with County Board Resolution File No. 91-756. The total project preliminary estimated cost was approximately \$40 million. The preliminary 1995 revised cost of the project has increased to an estimated \$48 million. Alternatives are still being evaluated. Only the County share of the project costs are reflected in the County capital improvement budget.

This is a City of Milwaukee project. A consultant contract for preliminary design was executed in mid-1993. This capital improvement budget request appropriates funds for the County's share of preliminary engineering and land acquisition cost. The replacement structure will provide the same traffic capacity as the existing viaduct. Replacement of the viaduct provides for continuation of the highway system recommended in the Southeastern Wisconsin Regional Planning Commission Planning Report No. 11, a Jurisdictional Highway System Plan of Milwaukee County.

DPW Staffing Plan

The DPW coordinator for this project will be Mr. Mahmoud Malas. Basic planning and design and project management for this project will be performed by the City of Milwaukee and consultants. Construction management will be performed by the Wisconsin Department of Transportation.

1998 RECOMMENDED CAPITAL IMPROVEMENTS MILWAUKEE COUNTY

Division 1203 - Major Rehabilitation - CTH

The 1998 recommendation for this project is for an appropriation of \$1,199,300.

1. In 1996, the County Board adopted Resolution File No. 96-210. This resolution authorized Milwaukee County to participate in the City of Milwaukee's rehabilitation of West Hampton Avenue, portions of which are under the jurisdiction of Milwaukee County (CTH EE). The rehabilitation project is being completed in multiple phases. Phase I which included County jurisdiction was funded out of the 1996 Capital Budget. The 1996 Phase I cost to Milwaukee County was underestimated by the City of Milwaukee. Based on a May, 1997 invoice, an additional \$98,500 equaling \$7,000 for preliminary engineering, plus \$91,500 for construction will need to be budgeted in fiscal year 1998 to cover this increased cost. An appropriation of \$98,500 is recommended for 1998 for the increase in the Phase I project cost.

The next phase involving County jurisdiction is scheduled for construction in 1998. The County Board in Resolution No. 96-210 authorized an advanced commitment of \$950,800 in the 1998 County Budget to be used to fund Phase III of the West Hampton Avenue Improvement Project. DPW will be submitting a CHIP application to WisDOT in November 1997 for this project. The CHIP entitlement will reimburse the County up to 50% of the cost of construction. An appropriation of \$950,800 is recommended for this phase for 1998.

2. An appropriation of \$150,000 is also recommended for 1998 to continue the development of a comprehensive pavement management database for the County Trunk Highway System. The program will require an annual expenditure of personnel hours to evaluate segments of pavement for determining the pavement condition index, for determining pavement life expectancy, and for ranking pavements for improvements within funding limits. The annual evaluations will be accomplished by DPW staff with the assistance of an appropriate consultant. This annual expenditure of personnel hours is not eligible for CHIP funding.

In addition, DPW will be submitting a CHIP application for preliminary engineering for proposed roadway rehabilitation projects. The roadways recommended for rehabilitation will be generated by October, 1997. Initially, the CTH's that will be targeted for rehabilitation are those that have been reconstructed to the ultimate design cross section, such as, but not limited to the following:

- Good Hope Road (CTH PP),
- Portions of Rawson Avenue (CTH B),
- Silver Spring Drive (CTH E),
- Portions of South 76th Street (CTH U), and
- Oklahoma Avenue (CTH NN)

DPW Staffing Plan

Overall project management will be performed by DPW staff. The DPW project manager will be Robert F. Doren. Specialized consultants may be used for some components of the basic planning and design and construction management phases of the project, as needed.

Specialized consultants may be retained for: archeological surveys; soils investigations; material testing; environmental testing; title searches for land acquisition; appraisers for land acquisition; real estate negotiators for land acquisition; special land acquisition litigators with the prior approval of Corporation Counsel; construction surveying; construction inspection; construction management, etc., as required, to complete the planning and design, land acquisition, and construction phases of the project.

**1998 RECOMMENDED CAPITAL IMPROVEMENTS
MILWAUKEE COUNTY**

Division 1205 - Bridge Replacement Program

The County has been aggressively replacing bridges with known deficiencies and safety concerns under this program. The bridge replacement program qualifies for 80% Federal and State funding. All listed projects in this program for 1998 have executed agreements with the Wisconsin Department of Transportation and were approved and prioritized by the County Board Resolution File Nos. 93-490, 95-346, and 95-522. Appropriations are recommended for the following projects:

Project	Supervisory District	Total Cost
West College Avenue Branch of the Root River (Engineering)	23	\$115,000
West Rawson Avenue (CTH BB) (Construction)	19	\$1,400,000
East College Avenue Oak Creek Tributary Bridge (Construction)	19, 17	\$550,000
Total		\$2,065,000

Following is a breakdown of the funding:

Project	Federal/State Revenues	Local Revenues	County Financing
West College Avenue	\$80,500	\$0	\$34,500
West Rawson Avenue (BB)	\$1,120,000	\$140,000	\$140,000
East College Avenue (ZZ)	\$440,000	\$0	\$110,000
Totals	\$1,640,500	\$140,000	\$284,500

West College Avenue Tributary over the Root River

This bridge carries West College Avenue over the Tributary of the Root River and is located approximately 1.0 miles west of 76th Street (State Highway 181) in Whitnall Park off the Root River Parkway and the City of Greenfield. The recommended appropriation totals \$115,000.

The existing bridge was constructed in 1940 and is a single span cast in place reinforced concrete flat slab. The bridge reinforced concrete slab is severely deteriorated and spalled, reinforcing steel is exposed and corroded, and structure railing is substandard. The condition of the structure is such that it is beyond rehabilitation through normal maintenance or repair. It requires replacement. The structure is structurally deficient with sufficiency number of 32.5 which qualifies it for 80% Federal and State funding under the Local Bridge Program. If this project is not undertaken in a timely manner, the condition of the deteriorated slab will worsen, and may eventually lead to a road posting for load limit, and/or closure. The County could also lose available funding under the Local Bridge Program as other municipalities within the County submit their proposed project for funding under this program and the County could end up funding this project with 100% County funds.

**1998 RECOMMENDED CAPITAL IMPROVEMENTS
MILWAUKEE COUNTY**

Division 1205 - Bridge Replacement Program

West Rawson Avenue (CTH BB) - Root River Bridge

This bridge carries West Rawson Avenue (CTH BB) over the Root River and is located 0.5 mile east of 76th Street in the City of Franklin. The recommended appropriation for the bridge replacement totals \$1,400,000. The existing bridge was constructed in 1957 and is a three span rolled beam deck girder bridge. The bridge is in poor condition having severe deteriorated and spalled concrete, exposed and corroded reinforcing steel bars, and both the bridge geometry and railing are substandard. The bridge's deteriorated condition is causing continuous undermining of the approach pavement due to earth migration through concrete spalls. In the abutment backwall, the steel rolled beams and bearing are corroded.

The condition of the structure is such that it is beyond rehabilitation through normal maintenance or repair. It requires replacement. The sufficiency number for this structure is 37.1 which qualifies it for 80% Federal and State funding under the Local Bridge Program. If this project is not undertaken in 1998, the condition of the deteriorated deck will worsen and continue to damage the already deteriorated concrete and may eventually lead to a road posting for load limit, and/or closure. The County also can lose available funding under the Local Bridge Program as other municipalities within the County submit their proposed project for funding under this program and the County could end up funding this project with 100% County funds. This project is planned to be constructed in conjunction with the roadway reconstruction under Org. 1222 - National Highway System West Rawson Avenue between 27th Street and Hawthorne Lane.

East College Avenue (CTH ZZ) - Oak Creek Tributary Bridge

This bridge carries East College Avenue over Oak Creek tributary and is located approximately 1 mile east of Howell Avenue, in the City of Milwaukee. The existing bridge was constructed in 1950 and is a single span cast-in-place concrete slab. The bridge is in poor condition having severely deteriorated and spalled concrete, exposed and corroded reinforcing steel bars, and the bridge railing is substandard. The bridge's deteriorated condition is causing continuous undermining of approach pavement due to earth migration through concrete spalls. The recommended construction appropriation totals \$550,000.

The condition of the structure is such that it is beyond rehabilitation through normal maintenance or repair. It requires replacement. The bridge is considered structurally deficient with a sufficiency number 29.5 which qualifies it for 80% Federal and State funding under the Local Bridge Program. If this project is not undertaken in 1998, the condition of the deteriorated deck will worsen and continue to damage supporting concrete girders and may eventually lead to a road posting for load limit or closure. The County also could lose available funding under the Local Bridge Program as other municipalities within the County submit their proposed project for funding under this program and the County could end up funding this project with 100% County funds.

The bridge replacement is presently being designed.

DPW Staffing Plan

The DPW coordinator for these projects will be Mr. Mahmoud Malas. Basic planning, design, and management of this project will be performed by County staff and/or consultants. Construction management will be performed by Wisconsin Department of Transportation and/or DPW staff.

Division 1206 - Traffic Safety Improvements

The following traffic safety improvements are recommended for 1998:

- West Rawson Avenue at South 10th Street
- North Port Washington Road at River Point Shopping Mall
- East College Avenue at Ace Industrial Drive

The intersection of West Rawson Avenue (CTH BB) and South 10th Street is currently controlled by a two-way stop sign. The continued growth in development in the south region of Milwaukee County has resulted in a rapid increase in the traffic using the intersection, which in turn has resulted in an increase in the number and severity of intersection traffic crashes. The intersection of East College Avenue (CTH ZZ) with Ace Industrial Drive and the adjacent drives have experienced a high number of traffic crashes. The continued growth in development at River Point Shopping Mall located along North Port Washington Road south of Brown Deer Road has resulted in a rapid increase in the traffic using North Port Washington Road which in turn has resulted in an increase in the number of traffic crashes in this area.

Since the majority of the crashes at West Rawson Avenue and 10th Street are right angle crashes, the type that can be prevented by the installation of traffic signals, the department proposes the installation of traffic signals to control the intersection traffic right-of-way assignment, thus eliminating the crashes. The intersection meets several of the warrants for signalization, as defined in the Manual on Uniform Traffic Control Devices.

The majority of the crashes on East College Avenue in the vicinity of Ace Industrial Drive and on North Port Washington Road at River Point Shopping Mall involve vehicles trying to access the drives. These types of crashes could be prevented by providing left-turn lanes, acceleration/deceleration lanes, signing and marking, and raised concrete loading zone islands to provide refuge areas.

To finance the projects, the Department of Public Works has requested funding from Wisconsin Department of Transportation for Federal funding under the Surface Transportation Program - Safety (formerly Hazard Elimination Program) for the proposed improvements. The funding would provide 90% of the project funds, with Milwaukee County being responsible for the remaining 10%. DPW is negotiating with the Village of Fox Point and Bayside to fund a portion of the local share for the project on North Port Washington Road.

Funding Summary

Intersection	Supervisory District	Project Cost	Federal Revenue	Local Govt. Revenue	County Financing
West Rawson Avenue @ 10th Street	19	\$187,450	\$168,705	\$9,372	\$9,373
East College Avenue @ Ace Industrial Drive	19, 24	\$50,000	\$45,000	\$0	\$5,000
North Port Washington @ River Point Shopping Mall	25	\$350,000	\$315,000	\$0	\$35,000
Totals		\$587,450	\$528,705	\$9,372	\$49,373

**1998 RECOMMENDED CAPITAL IMPROVEMENTS
MILWAUKEE COUNTY**

Division 1215 - Traffic Signal Improvements on CTH's

This project involves traffic signal improvements at two county trunk highway intersections with local city streets. The two improvements are necessitated by the proposed improvement of North 124th Street between West Hampton Avenue and West Silver Spring Drive by the City of Milwaukee and the Village of Butler. These two municipalities have requested County participation in the intersection improvements, since West Hampton Avenue and West Silver Spring are both county trunk highways.

This project will include the channelization and resignalization of the intersections of West Hampton Avenue and North 124th Street and West Silver Spring Drive and North 124th Street. Milwaukee County shares intersection jurisdiction of West Hampton Avenue and North 124th Street with the City of Milwaukee and the Village of Butler. The intersection jurisdiction of North 124th Street and West Silver Spring Drive is shared among Milwaukee County, Waukesha County, City of Milwaukee, and the Village of Butler.

County participation in the intersection work is expected by the other governmental agencies with which the County shares intersection jurisdiction. Staff also recommends participation by the County in order to facilitate proper design and construction of a safe intersection. If the County fails to participate and the other governmental agencies decide to proceed with the street improvement project excluding the intersections, the result would be undesirable bottlenecks at the intersections which would cause an increase in accident exposure potential for motorists using the facilities. Under that scenario, the County may find it necessary to undertake the intersection improvement projects to protect life and property, although the costs would be higher than currently required for participation. The Milwaukee County share of the project cost was included in the 1994 adopted capital improvement budget. However, the project was delayed by the City of Milwaukee and as a result the project bonds lapsed at the end of 1996. The project is scheduled for 1998 construction.

Intersection	Supervisory District	Project Cost	Reimbursement Revenue	Reimbursing Agency	County Financing
North 124th Street & Hampton Avenue	15, 18	\$75,000	\$18,750	Milwaukee	\$18,750
			\$37,500	Butler	
North 124th Street & Silver Spring Drive	18	\$75,000	\$18,750	Milwaukee	\$18,750
			\$18,750	Butler	
			\$18,750	Waukesha County	
Totals		\$150,000	\$112,500		\$37,500

DPW Staffing Plan

The DPW project manager for this project will be Fred Abadi. The basic planning and design, as well as construction management for this project will be performed by DPW staff.

Specialized consultants may be used for some components of basic planning, design, and construction management as needed. Specialized consultants may be retained as needed for; archaeological surveying; soils/materials/environmental testing and assessments; construction surveying; specialized legal counsel through the Corporation Counsel; appraisers/negotiators; title search consultants, etc., as required to complete planning, design and construction.

1998 RECOMMENDED CAPITAL IMPROVEMENTS MILWAUKEE COUNTY

Division 1222 - National Highway System

In 1991, Congress adopted the Intermodal Surface Transportation Efficiency Act, better known as ISTEA. ISTEA provided federal funding for improving the County Trunk Highway system. Two categories of ISTEA funding affect the County's Highway system: Surface Transportation Program - Urban (STP-U) and the National Highway System (NHS) program.

Currently, Milwaukee County has one project approved by WisDOT and FHWA for NHS funding. This project is as follows:

West Rawson Avenue, CTH "BB", from South 27th Street to Hawthorne Lane in the City of Franklin, including the highway bridges over West Loomis Road. NHS-L funds are established in the WisDOT program of projects for right-of-way acquisition and construction.

Due to the size and complexity of the project, the consultant will be breaking down the project into three construction contracts to be let in 1998, 1999, and 2000. The first letting in early 1998 for the portion South 73rd Street to Hawthorne Lane. The second letting in 1999 is for the portion South 73rd Street to South 47th Street. The third letting in 2000 is for the portion South 47th Street to South 27th Street.

The re-authorization of ISTEA by the U.S. Congress is anticipated for late 1997 or early 1998. When additional funding is determined, DPW will evaluate and recommend additional NHS roadway projects for consideration.

DPW Staffing Plan

Overall project management will be performed by DPW staff. The DPW project manager will be Robert F. Doren. Specialized consultants may be used for the construction management phase of the project, as needed. Specialized consultants may be retained for: archeological surveys; soils investigations; material testing; environmental testing; title searches for land acquisition; appraisers for land acquisition; real estate negotiators for land acquisition; special land acquisition litigators with the prior approval of Corporation Counsel; construction surveying; construction inspection; construction management, etc., as required, to complete the land acquisition and construction phases of the project.

**1998 RECOMMENDED CAPITAL IMPROVEMENTS
MILWAUKEE COUNTY**

Division 1226 - Bridge Rehabilitation Program

The County has in the past aggressively pursued the upgrading and rehabilitation of County bridges, to ensure public safety utilizing available Federal and State funds. All projects in this program qualify for 80% in Federal and State funds. Projects in this program have received County Board approval and prioritization via County Board Resolution.

Funding is being recommended for design and preparation for construction plans for the West Good Hope Road (CTH PP) bridges (\$380,000). These bridges carry West Good Hope Road over the Milwaukee River and are located approximately 0.5 miles east of North Green Bay Avenue [State Highway 57] in Village of River Hills.

The existing bridges were constructed in 1967 and are four span continuous haunched steel girder structures. The bridge's reinforced concrete deck and sidewalks are severely deteriorated and spalled and earth banks along both abutments are badly eroding. The structures vary in condition from poor to deficient.

The structures can be rehabilitated to extend their useful life and avoid major replacement costs. The sufficiency number for these structures varies from 30.7 to 64.9 which qualifies them for 80% Federal and State funding under the Local Bridge Program. If this project is not undertaken in 1998, the condition of the deteriorated deck will worsen and continue to damage supporting steel girders, eventually leading to a considerable increase in the cost of rehabilitation and may lead to further reduction of the posted load limit or closure of the road. The County also could lose available funding under the Local Bridge Program as other municipalities within the County submit their proposed projects for funding under this program and the County could end up funding this project with 100% County funds.

DPW Staffing Plan

The DPW coordinator for this project will be Mr. Mahmoud Malas. Basic planning, design, and management of this project will be performed by County staff and/or consultants. Construction management will be performed by Wisconsin Department of Transportation and/or DPW staff.

1998 RECOMMENDED CAPITAL IMPROVEMENTS MILWAUKEE COUNTY

Division 1255 - Major Repair Components Orions (1990-91) (50 Buses)

The Milwaukee County Transit System owns 538 buses, which were purchased between 1966 and 1991. The Federal Transit Administration (FTA), which participates in 80% of the capital cost of replacement buses, requires that they remain in revenue service for a minimum of 12 years. In order to achieve this service life, midlife inspections, or maintenance, is performed which at a minimum rebuilds the engine and transmission as well as rebuilding or replacing other major bus components. The Department has developed a Long-Range Bus Replacement/Bus Rehabilitation Program which schedules and programs bus replacement as well as bus rehabilitation (midlife inspections) activities. This budget is in accord with the long range equipment management program.

The project will involve replacement of outmoded and defective components on one hundred seventeen (117) 1990 Orion buses. Phase I (1997) consisted of specification development and work on 10 buses. Phase II (1998) will consist of work on approximately 50 buses. Phase III will complete an additional 57 buses by the end of 1999. This work will be done in conjunction with the midlife inspection and maintenance procedures of the Transit System.

The 117 Orions were purchased in 1990-91. The work being proposed will allow each bus to achieve the 12-year minimum useful life expectancy required by FTA.

In general, this capital project involves procurement of major component items which are eligible for 80% Federal reimbursement. These component items include:

- [1] Engine Cradle Rebuilding
- [2] Heating System Upgrade
- [3] Window Set Replacements
- [4] Chassis/Suspension Kit
- [5] Driver's Seat
- [6] Flooring

Installation of the purchased components is done by Transit System staff as an operating cost.

A Section 5307 formula grant application was filed with FTA in March, 1997, for full Federal funding based on the Phase I authorization. Specifications will be prepared in mid-1997. Competitive parts procurement and installation will follow during the balance of calendar year 1997 and through 1998 and 1999.

DPW Staffing Plan

The DPW project manager for the Major Repair Components project will be Ronald J. Rutkowski, Transportation Division. MTS staff will handle specification development.

Division 1256 - Replace 1950's Offset Printing Press

An appropriation of \$408,000 is recommended for 1998 to replace a 1950's offset printing press with a two-color Perfecting Press with numbering. In 1992, a consultant reviewing MTS Print Shop equipment recommended that in order to increase productivity, a multi-colored press with perfecting capabilities should be purchased. Since that time an increase in multi-colored printed materials and continued aging of current equipment, has further validated that recommendation.

All of the work done on MTS' 25-inch press is either two-sided or multi-colored. The existing 1950's Harris offset is in critical need of replacement. Parts are very difficult to obtain and the press speed is 1/3 of that offered by an older single colored offset press. Multiply the slow speed by the inability to be able to print two colors or 2 sides of the sheet at the same time and the production difference is staggering. The production rate increases from 4,500 printed sides an hour to 24,000 printed sides an hour on a two-sided one color job. In many cases where numbering and perforating are required, it can be done in-line, further increasing cost savings. The machine recommended will increase productivity over the current machinery by over 50% as illustrated below:

[1] Weekly Passes: (Four color press + special varnish, numbering and perforating)

Currently produced by running the job five times through the press and then through the Harris Numbering Press with an average production time for printing of 28 hours, the new machine would produce the same job in three passes through the press including numbering and perforating at an estimated production time of 13 hours.

[2] Tickets: (Three colors, two-sided + numbering and extensive perforating)

Currently produced by running through the press six times, with extensive set-up on the Harris Numbering Press as it is changed over from numbering passes, the new machine would produce the same job in three passes through the press, allowing the print shop to leave the Harris set up for the tickets, eliminating a day-and-a-half set-up now required to produce the tickets.

[3] Time Tables: (One color, two-sided)

Currently produced by running two times through the press, the new machine would allow the operator to print both sides of the time table at one time.

Increased productivity generally translates into reduced job completion time, given the already small print shop staff of five. Yearly overtime for the print shop staff will probably be eliminated. An additional benefit is greater copy protection. The new press is capable of printing multi-color, adding the benefit of specialty color protection for minimal cost increase. These sharp colored images are more difficult for copiers to reproduce, deterring attempts at counterfeiting passes and tickets and making counterfeits easily recognizable. The estimated productive life of the press would be over 50 years. This can be validated by the life span of the shop's 1914 Kidder transfer press, still the fastest most cost effective way to produce transfers.

The new press permits a gain of over 50% more operating time. This will allow the Print Shop to produce in-house, many of the jobs now sent to outside vendors because of press time. Buslines, Hi-Lites, many marketing brochures and flyers could be completed in-house, offering the potential of additional savings.

**1998 RECOMMENDED CAPITAL IMPROVEMENTS
MILWAUKEE COUNTY**

Division 1256 - Replace 1950's Offset Printing Press

All costs are eligible for 80% reimbursement funding by the Federal Transit Administration. Adoption of this project will result in a Section 5307 formula grant application to FTA in March, 1998 with Federal funds available in July, 1998.

DPW Staffing Plan

The DPW project manager for the replacement printing press project will be Ronald J. Rutkowski, Transportation Division. MTS staff will act as planning consultants, and construction (installation).

1998 RECOMMENDED CAPITAL IMPROVEMENTS MILWAUKEE COUNTY

Division 1257 - Bus Replacement Program

The 1998 recommended capital improvement budget authorizes the procurement of 120 buses through a 3-year requirements contract. No appropriation is required in 1998; however, the County will have a contractual obligation to appropriate monies in the 1999 capital improvement budget.

The Milwaukee County Transit System owns 538 buses, which were purchased between 1966 and 1991. This project is to begin replacing the 87 GMC 5300 Series buses resulting from adopted County Board Resolution File No. 97-229 dated 3/20/97. The articulated bus replacements will follow the GMC 5300 Series replacements, but will be combined with the 5300 Series for the procurement process.

The Federal Transit Administration (FTA), which participates in 80% of the capital cost of replacement buses, requires that they remain in revenue service for a minimum of 12 years. In order to achieve this service life, midlife inspections, or maintenance, is performed which at a minimum rebuilds the engine and transmission as well as rebuilding or replacing other major bus components. The Department has developed a Long-Range Bus Replacement/Bus Rehabilitation Program which schedules and programs bus replacement as well as bus rehabilitation (midlife inspections) activities. This budget is in accord with the long range equipment management program.

In the past, FTA Section 9 formula funds were sufficient to purchase replacement buses when they were needed. 1994 saw a reversal of diminishing Federal capital funds under the Intermodal Surface Transportation Efficiency Act (ISTEA). Even with this change in Federal funding levels, rapidly increasing bus prices and needed safety/security options such as driver partitions and cameras, Americans with Disabilities Act (ADA) accessories, and possible alternate fuel requirements, have resulted in greater difficulty replacing buses according to the planned replacement program.

New funding sources such as Federal Congestion Mitigation and Air Quality (CMAQ) funds and greater reliance on FTA Section 3 discretionary funds, provide new opportunities to maintain the program and are aggressively pursued.

The 87, 1996-67 GMC 5300 Series buses reached the end of their FTA required 12-year service life in 1978-79. Major rebuilding between 1983 and 1985 has permitted these buses to be kept in service to this point and will permit them to continue until 87 buses are delivered. Several of these buses already have one million miles on them. The last of these buses will be 34 years old as they are replaced.

The 1985 crown articulated buses reach the end of their FTA required 12 year service life in 1997, but must be maintained in Milwaukee County service until 1999 because of a Safe Harbor Lease. These buses, of European origin, have been very expensive to maintain and have experienced many breakdown problems.

Replacement of these buses will advance the goals of fleet standardization, ADA accessibility, improved fuel economy, and reduced exhaust emissions for cleaner air. The specification includes the following components: electronic fareboxes, pre-wiring for the AVL Radio System, and security cameras.

All costs are eligible for 83% FTA reimbursement. A Section 3 discretionary grant application was filed with FTA in March, 1997, authorized by Resolution File No. 97-229. This Resolution also assured local funding in the 1998 budget. A \$5.9 million grant offer, sufficient to purchase approximately 30 buses had recently been announced by FTA as part of the State of Wisconsin application. The remaining buses will be purchased in the future using 5307 formula funds or 5309 discretionary funds, if available.

**1998 RECOMMENDED CAPITAL IMPROVEMENTS
MILWAUKEE COUNTY**

Division 1257 - Bus Replacement Program

For the sake of price stability and fleet standardization, the 1997 procurement will secure prices for all 120 buses through a 3 year requirements contract. The County Board will provide authorization to actually purchase the balance of the buses in future Resolutions.

DPW Staffing Plan

The DPW project manager for this Bus Replacement project will be Ronald J. Rutkowski, Transportation Division. Milwaukee Transit Services staff have handled the planning and will handle assembly inspection (construction management) functions.

Division 1259 - Replace Data General Computer

An appropriation of \$337,000 is recommended for 1998 to complete the purchase of a replacement computer. The project was originally funded at \$854,000 in the 1996 and 1997 capital budgets and Federal Transit Administration (FTA) 80% reimbursement funding was obtained in July, 1996, based on the policy approval signified by the initial January, 1996 County funding.

Proposals for the project were received April 22, 1997. The proposed hardware/software costs were greater than original estimates resulting in the higher than anticipated 1998 project appropriation.

DPW Staffing Plan

The DPW project manager for the Computer Replacement will be Ronald J. Rutkowski, Transportation Division. Milwaukee Transit Services staff will handle installation oversight.

Division 1262 - Automatic Passenger Counters

A 1998 appropriation of \$250,000 is recommended to complete the purchase of the Automatic Passenger Counter (APC) and Reporting System.

The project was originally funded at \$350,000 in the 1995 capital budget and Federal Transit Administration (FTA) 80% reimbursement funding was obtained in July, 1995. 1995 budget estimates were developed after discussions with several APC vendors. Using the 10% of fleet rule (50 buses) multiplied by the estimated unit cost of \$7,000, the \$350,000 budget was developed.

Because these APC units were proposed to be integrated with global positioning satellite automatic vehicle location (AVL) system, extensive specification development took place, followed by extensive work by the Milwaukee County Procurement Division. The Procurement Division split the original format into two parts to develop greater competition.

DPW Staffing Plan

The DPW project manager for the Automatic Passenger Counters will be Ronald J. Rutkowski, Transportation Division. Milwaukee Transit Services staff will handle installation oversight.

Division 1266 - Replacement of Rolm Telephone Switch

An appropriation of \$200,000 is recommended for 1998 for the replacement of the main MTS telephone switching system.

The current system, a Rolm Switch CBX 8000, was installed in June, 1981 and has handled an average of 1.6 million calls per year. The manufacturer is limiting maintenance support for this equipment, and has indicated that additional software upgrades are no longer available. Technological advances in recent years have rendered this system obsolete.

Cost estimates have been received from WilTel, Ameritech and Norstan for a replacement telephone switching system including planning and administration at \$200,000. This cost includes ACD (Automatic Call Distribution) and Voice Mail.

All costs are eligible for 80% reimbursement funding by the Federal Transit Administration. Adoption of this project will result in a Section 5307 formula grant application to FTA in March, 1998 with Federal funds available in July, 1998.

DPW Staffing Plan

The DPW project manager for the Rolm Telephone Switch project will be Ronald J. Rutkowski, Transportation Division. MTS staff will act as planning and construction management consultants.

1998 RECOMMENDED CAPITAL IMPROVEMENTS MILWAUKEE COUNTY

Division 1271 - Facility Assessment Program - Transit Facilities

The 1998 recommended capital improvement budget provides an appropriation of \$138,800 to conduct a facility assessment of all transit facilities. Federal 5307 planning funds are eligible to cover 80% of project expenses. This assessment will examine 792,935 square feet of transit facilities.

A Section 5307 grant application to FTA will be filed on March 31, 1998, with federal funds available in July, 1998. In order for federal reimbursement funds to be used for this work, no contract can be signed or planning work commenced for transit facilities until receipt of the federal grant approval and funding in July, 1998.

The \$27,760 local share financing for this project is not eligible for long term debt financing. Property tax revenues are recommended for project financing in 1998.

DPW Staffing Plan

The DPW project manager for the Transit Facility Assessment Program will be Michael Zylka, Program Coordinator, MTS and DPW Transit staff will cooperate in the project.

1998 RECOMMENDED CAPITAL IMPROVEMENTS MILWAUKEE COUNTY

Division 1308 - GMIA - Phase I Mitigation Program

This project continues the Phase I Noise Mitigation program for residences outlined in the Noise Compatibility Study. This program offers homeowners the options of reducing the level of aircraft noise in their homes through sound insulation, selling of the home with the assistance of the sales assistance program, or providing compensation for any negative influence as a result of aircraft activity through the purchase of an aviation easement. The program applies to these properties located within the 70 Ldn based on 1997 noise compatibility contours which are located in the Cities of Oak Creek, Cudahy, St. Francis and Milwaukee.

An estimated total of 1,602 homes and 41 multi-family buildings are eligible for this mitigation program. It is assumed that all of the 41 multi-family units would be sound insulated. A recent survey of potential participants indicates that 96% of homes will select sound insulation (1538). The balance of the 1602 homes would select the Sales Assistance Program (64). Based on the recent survey there is no participation projected for the Aviation Easement Option. If Aviation Easements are developed it is anticipated that they will be less expensive than the Sales Assistance Option.

The project costs for the sales assistance option are based on \$8,000 per home and will increase with inflation, and the estimated cost for the sound insulation option is \$30,000 per home which is based on similar programs. The costs for sound insulating apartment buildings are estimated to be \$5,500 per unit. There are approximately 470 units eligible for the program.

Based on the participation assumptions, the sales assistance option would cost approximately \$500,000, the multi-family building sound insulation would cost approximately \$2,600,000, and the single family home sound insulation would cost approximately \$55,400,000. A 25% contingency factor that includes administration and transaction costs has been added to the project costs. The total escalated project cost excluding bond financing and interest cost is projected to be \$60,185,000 between 1996 and 2001.

The \$60,185,000 total escalated project cost is based on information formulated during two years' project activity and represents a departure from the \$34,092,000 total project estimate stated in the Airport's Passenger Facility Charge (PFC) Applications and its Capital Improvement Plan (CIP). The original cost estimates in the PFCs and CIP were based on projections from the Noise Compatibility Study conducted by Coffman Associates Inc., dated October 1993, which used the best information available at the time.

In 1998 the total projected cost of the program is \$7,677,000. The source of funds for 1998 would be \$4,189,000 in Passenger Facility Charge Revenues, and \$3,488,000 in State and Federal Grants. No tax levy financing is provided or required.

DPW Staffing Plan

The DPW Project Manager for this project will be C. Barry Bateman. A consultant, Terrell, Hundley and Carroll, has been hired to perform the mitigation. DPW staff will be involved in maintaining appropriate records of the mitigation.

**1998 RECOMMENDED CAPITAL IMPROVEMENTS
MILWAUKEE COUNTY**

Division 1318 - GMIA - 7L-25R Extension

The 7L-25R runway was constructed and realigned in 1996. This runway was relocated on the north side of the terminal complex approximately 3,700 feet north and parallel to Runway 7R/25L with a length of 4,146 feet. The 1998 project will consist of adding a 654 foot long by 100 foot wide bituminous runway extension to the northeast end with an associated taxiway. An Environmental Impact Statement (EIS) is presently being conducted for the runway extension and should be completed in late 1997. The total length of the runway will be 4,800 feet after the project is completed. At this length smaller commuter aircraft operating at GMIA will be able to use this runway for departures and arrivals in Visual Flight Rule (VFR) conditions, and for departures in Instrument Flight Rule (IFR) conditions. Having this capability will provide additional capacity to GMIA's main runways for large and heavy aircraft.

The total project cost is \$1,875,000. The source of funds would be \$1,546,000 in Federal and State Grants and \$329,000 in Passenger Facility Charge Revenue. No tax levy financing is provided or required.

DPW Staffing Plan

DPW staff will be used for overall project management. Specialized consultants may be used for some components of basic planning, design, and construction management as needed. Specialized consultants may be retained as needed for: archaeological surveying; soils/materials/environmental testing and assessments; construction surveying; specialized legal counsel through the Corporation Counsel; appraisers/negotiators; title search consultants, etc., as required to complete planning, design and construction.

1998 RECOMMENDED CAPITAL IMPROVEMENTS MILWAUKEE COUNTY

Division 1325 - GMIA - New Parking Facilities

Currently, the airport has 8,375 public parking spaces to meet a growing demand. This includes 700 spaces in the surface lot, 1,800 in the remote lot and 5,875 in the parking garage. Also, during peak periods, a temporary 500 space gravel surfaced remote lot has been used. For the 1997 "spring peak", a section of the northwest cargo ramp has received conditional approval from the FAA for parking of up to 1,000 vehicles, bringing temporary capacity to 9,875 vehicles. However, the FAA will not approve this temporary solution on a long term basis. Using this airfield area is not practical based on long range plans. It should also be noted that due to various operating factors like scattered parking sites, possible snow removal needs and use of unstriped temporary lots, the "practical" parking capacity can be closer to 9,500.

Public parking utilization at the airport has generally followed the long term growth trend for passenger traffic. Although the Airport Master Plan projects long term growth at 3.5% per year, enplaned passenger volume increased 24.8% from 2,189,052 in 1992 to 2,732,965 in 1996, while parking exits increased 24.4% from 1,147,404 to 1,426,909 during this period. More importantly, during this same time, average peak parking occupancy increased. The actual number of parked vehicles reached 8,738 during the March/April peak in 1996. With 1997 peak volumes for January and February up 6.9% and 10.8% over the prior year, it is anticipated that parking will reach the practical capacity or a peak of about 9,500 vehicles this year.

A parking consultant's study completed in 1995 on future airport parking needs concluded that, based upon current trends and master plan projections, a 5,000 space parking garage addition would be needed to meet parking demand by the year 2005. The study recommended that new surface lot parking be created to meet demand until a garage was financially feasible.

The airport staff believes that it is prudent to begin design work only for a new parking structure, to be built as demand and financial feasibility dictate.

Subsequently, an appropriation of \$3,941,700 is recommended for 1998 for the initial planning and design of a parking structure in the location recommended by the parking consultant. While the full cost of the structure will not be known until the design is completed, it is anticipated that \$38,734,000 in construction appropriations will be requested in the 2000 and 2001 capital improvement budgets.

The Airport will ensure that management contracts for operating this parking facility will comply with federal law recognizing the private activity nature of for profit parking management contracts.

DPW Staffing Plan

DPW will perform the overall management of the project. It is anticipated that consultants will be retained to perform design and construction management for the project.

Specialized consultants may be used for some components of basic planning, design, and construction management as needed. Specialized consultants may be retained as needed for: archaeological surveying; soils/materials/environmental testing and assessments; construction surveying; specialized legal counsel through the Corporation Counsel; appraisers/negotiators; title search consultants, etc., as required to complete planning, design and construction.

Division 1332 - GMIA - School/Church Sound Insulation

The Part 150 Noise Compatibility Study recommended a mitigation program offering sound insulation to 10 schools and one nursing home within the 65 Ldn 1997 noise contour and two churches within the 70 Ldn noise contour. There are six schools, one nursing home and a church in Phase I of the School/Church Sound Insulation Project. The nursing home and two of the schools are under contract. Two additional schools have been designed and could be bid, pending sufficient funding from the FAA and State of Wisconsin. The last two schools and a church are being budgeted for the years 1998 and 1999. The remaining four schools and a church are in Phase II of the School/Church Sound Insulation Project. Phase II facilities require environmental clearance prior to project initiation. The facilities will be assessed upon completion of the Environmental Impact Statement for the departure procedures. Milwaukee County will seek an Aviation Easement in exchange for the sound insulation.

The total project cost of Phase I is estimated at \$8,485,000 which includes a 19% contingency factor that includes administration and design costs, and a 3% per year inflation factor. The total escalated project cost estimate does not include bond financing and interest costs.

The total escalated Phase I project cost is based on information formulated during two year's project activity and represents a departure from the \$6,585,000 total project estimate stated in the Airport's Passenger Facility Charge (PFC) Applications and its Capital Improvement Plan (CIP). The original cost estimates in the PFCs and CIP were based on projections from the Noise Compatibility Study conducted by Coffman Associates Inc., dated October 1993, which used the best information available at the time.

In 1998 the total projected cost of the program is \$3,433,000. The source of funds for 1998 would be \$1,750,000 in State and Federal Grants and \$1,683,000 in Passenger Facility Charge Revenue.

DPW Staffing Plan

The DPW Project Manager for this project will be C. Barry Bateman. A consultant, Terrell, Hundley and Carroll, has been hired to perform the mitigation.

Scheduled Project Closeout	11/98

1998 RECOMMENDED CAPITAL IMPROVEMENTS MILWAUKEE COUNTY

Division 1373 - GMIA - Rehabilitate West FBO Apron

The project includes the rehabilitation of 31,400 square yards of the west FBO apron just east of the crossing taxiway.

The existing 31,400 square yard apron is concrete which was constructed in the mid-1940's. The apron surface requires extensive maintenance and is well worn and in need of rehabilitation. The proposed rehabilitation would include reconstructing the apron with 6 inches of an econcrete base and 17 inches of a concrete surface course. The project will be designed and constructed in accordance with standard Federal Aviation Administration specifications.

The funding for the design of the project was authorized in the 1996 Adopted Capital Improvement Budget, with construction anticipated to take place in 1997. The project was delayed for a year, but the design will proceed in 1997 and it is anticipated that construction will occur in 1998.

The cost estimates for the West FBO Apron Rehabilitation were formulated by the engineering firm of HNTB during the process of preparing the Airport Master Plan. The total estimated cost of the project is \$2,760,000 with design at \$266,000, project implementation at \$376,000 and construction at \$2,184,000. The construction costs of this project are estimated based on 31,400 square yards of paving multiplied by a cost per square yard of approximately \$70.

In 1996 the \$266,000 for design was funded with "Pay-As-You-Go" Passenger Facility Charge (PFC) revenue. The funding for the construction portion of the project was included in the airports PFC II Application of 1995 and the 1998 total projected cost of \$2,494,000 would be funded with \$1,247,000 in state grants and \$1,247,000 in PFC Revenues. No tax levy financing is provided or required.

DPW Staffing Plan

DPW staff will be used for overall project management. Specialized consultants may be used for some components of basic planning, design, and construction management as needed. Specialized consultants may be retained as needed for: archaeological surveying; soils/materials/environmental testing and assessments; construction surveying; specialized legal counsel through the Corporation Counsel; appraisers/negotiators; title search consultants, etc., as required to complete planning, design and construction.

**1998 RECOMMENDED CAPITAL IMPROVEMENTS
MILWAUKEE COUNTY**

Division 1378 - Nonpoint Source Pollution Control Program - Various Sites

An appropriation of \$337,000 is recommended for 1998 to continue a program of nonpoint source pollution control. The following work elements are recommended.

Milwaukee County Grounds Wet Retention Pond #3

The Milwaukee County Grounds (MCG) has been designated as a high priority segment in an existing urban area within the Menomonee River Priority Watershed. The land area involved equals approximately 2.5 square miles. The southeasterly one quarter of this area, the medical quadrant, is intensely developed and is the site of the Milwaukee Regional Medical Center.

In 1994, a stormwater management study of the MCG was performed, dealing with stormwater runoff quality and quantity and its impact on the Menomonee River. A copy of this study is available for inspection at the DPW offices. Certain recommendations made by the study regarding stormwater management wet retention ponds have been approved for implementation in the 1995 and 1996 Capital Budgets. The next step in the implementation recommendations is Wet Retention Basin #3. This basin will collect stormwater runoff from the developed northwest quadrant (Fleet, MRMC Joint Warehouse, Parks Landscape Services and Propagation Center) and portions of West Watertown Plank Road. This basin will also provide treatment of the water through settling of pollutants. The design and construction of this project will be funded in part (50%) by a grant from the Wisconsin Department of Natural Resources (WDNR) under the Nonpoint Source Pollution Abatement Program. The total cost of the work element is \$240,000. This requires a 50% County matching funds commitment.

Wet Retention Basin #2 and Streambank Stabilization - Sites 1-5, 7 at Milwaukee County Grounds - Engineering Feasibility Study

Milwaukee County proposes to perform stormwater management activities at the Milwaukee County Grounds as recommended by the final report "A Storm Water Management Plan for the Milwaukee County Grounds" as prepared by Woodward Clyde Consultants during 1995. This report was funded 100% by a previous WDNR Local Assistance Grant. The MCG is located in the Menomonee River Priority Watershed.

The report recommends three wet retention ponds be constructed in Phase II of the implementation plan. Basin 1 is a new basin under construction. Basin 3 would be a new basin. Basin 2 is a rehabilitation of an existing basin. The report also recommends that six different streams be stabilized. The streams are located in the following quadrants of the MCG: Northeast Quadrant, 1 stream, 1,100 ft.; Southeast Quadrant, 3 streams, 900 ft.; Southwest Quadrant, 1 stream, 700 ft.; and Northwest Quadrant, 1 stream, 500 ft.

The Milwaukee County Board of Supervisors has endorsed the goals and objectives of the Menomonee River Priority Watershed Program and has approved, in principle, the Menomonee River Nonpoint Source Control Plans. Resolution File No. 91-198 was approved 9/5/91 with a vote of 23 - 0. Other WDNR currently designated Priority Watersheds within Milwaukee County include the Milwaukee River South and the Kinnickinnic River.

DPW recommends the conduct of an engineering feasibility study for Basin 2 and the streambank stabilization sites to determine the scope of each project and to establish cost estimates that reflect current area construction costs.

The total cost of this work element is \$30,000. This budget includes a 50% WDNR contribution under a Nonpoint Source Pollution Abatement Program LAG grant requiring a 50% County matching funds commitment.

1998 RECOMMENDED CAPITAL IMPROVEMENTS MILWAUKEE COUNTY

Division 1378 - Nonpoint Source Pollution Control Program

14 Sites on the Menomonee River and Honey Creek

Milwaukee County Parks received approval in 1994 to perform streambank erosion control within a segment of the Menomonee River and Honey Creek in the City of Wauwatosa. Since 1994, streambank stabilization at fourteen (14) Menomonee River and Honey Creek sites has been designed, with construction completed at eight (8) sites and construction ongoing at another three (3) sites. Previously authorized construction at the three remaining sites has been postponed, due to a budget shortfall of County matching funds attributable to higher than anticipated construction costs. All the sites are in the Menomonee River Priority Watershed. The streambank segments will be stabilized using the latest soil bioengineering techniques.

The Milwaukee County Board of Supervisors has endorsed the goals and objectives of the Menomonee River Priority Watershed Program and has approved, in principle, the Menomonee River Nonpoint Source Control Plans. Resolution File No. 91-198 was approved 9/5/91 with a vote of 23 - 0. Other WDNR currently designated Priority Watersheds within Milwaukee County include the Milwaukee River South and the Kinnickinnic River.

The planning and design of this project has been completed and funded 100% by a previous WDNR Local Assistance Grant. Funding for the construction of these remaining sites will be provided by a 70% WDNR contribution under the Nonpoint Source Grant and a required 30% County matching funds commitment. The total cost of this work element is \$142,000 with \$67,000 recommended in 1998. Revenue anticipated for 1998 totals \$46,900.

DPW Staffing Plan

The DPW Project Manager for these projects will be Greg High. On Basin #3 basic planning, design and preparation of bidding documents will be performed by a consultant. The construction management duties such as programming, value engineering, contract administration and inspection will be performed by DPW staff. On Basin #2 and various streambank stabilization sites, the engineering feasibility study will be performed by a consultant. On 14 Sites on the Menomonee River and Honey Creek, the design and preparation of bidding documents is complete. Construction management will be by DPW staff.

Specialized consultants may be used for some components of basic planning, design, and construction management as needed. Specialized consultants may be retained as needed for: archaeological surveying; soils/materials/environmental testing and assessments; construction surveying; specialized legal counsel through the Corporation Counsel; appraisers/negotiators; title search consultants, etc., as required to complete planning, design and construction.

Division 1405 - McGovern Park Redevelopment

The project involves the removal of the McGovern Swimming Pool and conversion of the existing bathhouse and the park into a community center/nature study facility. The development of the park and associated costs are scheduled over 1997, 1998 and 1999. In 1997 (Phase I) the pool and associated structures were demolished, ten foot garage doors were installed on two (2) existing storage buildings and the former bathhouse was remodeled for use as a community center. Other site improvements included the removal of an electrical substation, the asphaltting of the area around the old bathhouse and the installation of a picnic shelter in the park.

Plans for 1998 would remove the pump house and provide a meter pit for the water supply to the lagoon at a cost of \$40,000. Future appropriations of \$128,750 would be required for project completion.

DPW Staffing Plan

DPW staff will be used for overall project management. Specialized consultants may be used for some components of basic planning, design, and construction management as needed. Specialized consultants may be retained as needed for: archaeological surveying; soils/materials/environmental testing and assessments; construction surveying; specialized legal counsel through the Corporation Counsel; appraisers/negotiators; title search consultants, etc., as required to complete planning, design and construction.

**1998 RECOMMENDED CAPITAL IMPROVEMENTS
MILWAUKEE COUNTY**

Division 1406 - County-wide Play Area Redevelopment Program

Due to the deteriorating conditions of play areas throughout the County and the increasing demand for higher quality play areas, the Parks Department initiated a systematic, county-wide, redevelopment of play areas to bring them up to current standards. Between 1989 and 1997, 58 play areas have been funded and scheduled for renovation. The community has been very receptive of this program and requests for the improvement of additional play areas continue to be received.

New play equipment and surfacing must now meet Consumer Product Safety Commission Guidelines. In addition, the Americans with Disabilities Act (ADA) requires that new play areas be barrier-free.

There are 28 play areas needing redevelopment left in the system. An appropriation of \$100,000 is recommended for 1998 to allow the Parks Department to continue redevelopment efforts.

The Parks Department also recommends that the asphalt surfacing underlying the swing sets at various locations be removed.

DPW Staffing Plan

Basic planning and design and construction management for this project will be performed by the Parks Department Facilities Planning Division staff.

1998 RECOMMENDED CAPITAL IMPROVEMENTS MILWAUKEE COUNTY

Division 1409 - Gordon Park Redevelopment

The swimming pool recommendations, as suggested by the 1994 UWM study, were adopted by the County Board and supported by the County Executive. The study pointed out the need to examine underutilized and structurally unsound facilities for possible replacement of the outmoded pool with other recreational opportunities. The Parks Department recommended, and the County Board and County Executive agreed, that the best approach for the Gordon Park area is to close the existing unsound pool and to develop, with the assistance of a consultant and area residents, a long term plan for recreation that will better meet the needs of the Riverwest community.

In 1997, a consultant was retained to perform research, conduct interviews, establish and work with focus groups, and generally carry out and assist the Parks Department in the identification and evaluation of alternative uses and programs for Gordon Park.

The 1998 recommended appropriation of \$250,000 would include the demolition of the pool and initial development of alternative uses, identified by the Parks Department's consultant.

DPW Staffing Plan

Department of Public Works will perform most primary and administrative functions on this project. Assigned DPW project managers will be Eriks Krumins (Architectural) and Greg High (Engineering).

Specialized consultants may be used for some components of basic planning, design, and construction management as needed. Specialized consultants may be retained as needed for: archaeological surveying; soils/materials/environmental testing and assessments; construction surveying; specialized legal counsel through the Corporation Counsel; appraisers/negotiators; title search consultants, etc., as required to complete planning, design and construction.

**1998 RECOMMENDED CAPITAL IMPROVEMENTS
MILWAUKEE COUNTY**

Division 1410 - Parkway Drive Reconstruction Program

An appropriation of \$250,000 is recommended for 1998 to complete project design for Lincoln Memorial Drive. Construction financing will be required in 1999 and 2000 to complete this \$6,500,000 project. Since 1989, the County has been aggressively upgrading its extensive parkway drive system. Each year, the Department of Public Works provides a pavement rating for all of the system's roadways. This evaluation looks at traffic volume, condition of pavement, overall riding comfort, and drainage condition. The evaluation scale results in an objective action plan divided into five categories:

<u>Rating</u>	<u>Action</u>
0-40	Reconstruction immediately
41-60	Reconstruction in 2-4 years
61-80	Reconstruction in 5-10 years
81-90	Normal maintenance (i.e. crackfilling etc.)
91-100	Excellent condition with no action required

For 1998, Lincoln Memorial Drive received the worst rating of all parkway drives indicating that it was the most in need of repair. It is the most highly utilized parkway drive and its reconstruction will have to be carefully scheduled to avoid conflicts with scheduled events and activities that take place on the Lakefront. Lincoln Memorial Drive is 3.41 miles in length and 55' wide. It runs from East Michigan Avenue to Lake Drive at Kenwood Avenue. Improvements will include new lighting, new curbs and gutters, catch basins, inlets and sewer adjustments, milling and repaving.

DPW Staffing Plan

DPW staff will be used for overall project management. Specialized consultants may be used for some components of basic planning, design, and construction management as needed. Specialized consultants may be retained as needed for: archaeological surveying; soils/materials/environmental testing and assessments; construction surveying; specialized legal counsel through the Corporation Counsel; appraisers/negotiators; title search consultants, etc., as required to complete planning, design and construction.

**1998 RECOMMENDED CAPITAL IMPROVEMENTS
MILWAUKEE COUNTY**

Division 1411 - Parks Infrastructure Improvements

The Parks Department has been pursuing an aggressive infrastructure preservation program during the past few years. A preventive, proactive review of physical plant condition has been performed on 108 buildings used as pavilions, pool bathhouses, golf clubhouses, restaurants, and community centers. Condition assessments on 107 structures, including comfort and service buildings, have also been completed. In 1989 the roof systems of all public use buildings were carefully evaluated to further assure preventive maintenance on these key structural components. In 1990, heating, ventilating, and air conditioning system (HVAC) evaluations were conducted on all major park buildings. In 1991, a parks lighting system evaluation was conducted on all park paths, drives, and parking lots. In 1993, a study was prepared which outlined a program to update electric service at approximately 45 locations. In 1995/1996 a strategic plan was prepared to identify specific park goals, objectives, and guidelines for 3 years and a general view for the next 5 - 10 years.

In addition, annual or biennial evaluations of roadways, parking lots, tennis courts, and bridges are prepared by the Department of Public Works. The Parks Facilities Division also conducts annual planning workshops with each park region and division to better determine facility problems and needs. In 1997, 18 projects totaling \$2,086,000 were budgeted.

The recommended appropriation for 1998 of \$1,557,400 will provide funding for a number of the high priority infrastructure projects identified through these analyses. A portion of project expenses are not eligible for long term debt financing. Project costs of \$524,000 are identified as expensed improvements and are recommended to be financed from power plant sale revenues.

<u>Project Element</u>	<u>Amount</u>
Greenfield - service yard/pool parking lot	\$139,900
Mitchell Domes - reconstruct south parking lot	114,000
Tiefenthaler - reroof	37,500
Currie - service building reroof	23,000
Vogel - repair fire damage (exp)	50,000
Brown Deer Golf Course Improvements	50,000
Dretzka - bridge replacement	50,000
Grant - Oak Creek Channel (exp)	30,000
Boerner - service building renovations, Phase II	159,000
Kosciuszko Community Center - reroof	260,000
Various - Phase VIII HVAC	50,000
Various - lighting systems renovation & security systems	150,000
Various - roof repairs (exp)	30,000
Various - electric service (exp)	50,000
Various - park walk repairs (exp)	214,000
Various - catch basin repairs (exp)	25,000
Various - priority repairs (exp)	75,000
Various - pool repairs (exp)	<u>50,000</u>
TOTAL	\$1,557,400

DPW Staffing Plan

Department of Public Works staff will perform most primary planning and administration functions on this project. However, some specialized sub-consultants will be hired for basic planning and design. Assigned DPW Project Managers will be Eriks Krumins (Architectural Projects) and Greg High (Engineering Projects).

**1998 RECOMMENDED CAPITAL IMPROVEMENTS
MILWAUKEE COUNTY**

Division 1434 - Bender Park - Waterfront Park Construction

In 1992 and 1993, planning and feasibility studies were completed. In 1994, \$1,870,900 was budgeted to plan and begin Phase One. The critical issue identified in these studies was shoreline/bluff stabilization. It is estimated that unchecked, the current rate of loss along the bluff averages 3 to 5 feet annually with individual storms capable of causing localized losses of the same scope. Historical records indicate localized losses in excess of 400 feet in the past 45 years.

The phasing of this project contains the following four components: Phase One - Shoreline and Bluff Stabilization, Phase Two - Waterfront Park, Phase Three - Championship Golf Course, and Phase Four - Regional Park. The projected estimate of the cost of the entire project is approximately \$25.2 million. The portion recommended in this budget is the second phase, Waterfront Park Plans & Specifications. The plan currently under consideration contains the following components:

Phase One - Shoreline and Bluff Stabilization (1994-1996)

Activities involved completion of the design of the protection of the toe of the bluff, slope regrading and stabilization. Construction included the installation of stone revetment along the Lake Michigan shoreline and regrading of the bluff slope behind the stone revetment. Also included in the Phase I construction was the installation of a gravel road from E. Ryan Road through the upper park land to the top of the bluff. This road provides access and parking for passive use of the park and observation opportunities for the public. An amount of \$5,150,000 was included in the 1995 Capital Improvement Budget for this phase.

Phase Two - Waterfront Park (1997-1998)

The initial plan for this phase includes the design and construction of a protected boat launch and support facilities such as roadways, utilities, parking lots, lighting, fishing platforms, restrooms, jib boom hoists, and beach area. Work for this phase would occur in 1998. An amount of \$525,000 was adopted in the 1997 Capital Improvement Budget for the waterfront park. An amount of \$5,725,000 is recommended in the 1998 budget. The Parks Department will need to apply for Recreational Boating Facilities Program funds for 50% of this project's total cost based on the recommended financing plan.

Phase Three - Championship Golf Course (1999-2000)

Current planning calls for approximately + 200 acres of the upland park to be occupied by a championship golf course including a full service practice area, clubhouse, pro-shop and gallery space. The design and construction of this phase would occur in 1999-2000.

Phase Four - Regional Park (2000)

Adjacent to the championship golf course, approximately 100 acres is programmed for traditional park facilities such as picnic areas, ball fields, play fields, play equipment, passive recreation areas, bike and walking trails.

The project is designed so that each of the four phases are "stand alone" components. The County is not obligated to implement subsequent phases. Subsequent phases will be reviewed and evaluated by the County Executive and the County Board of Supervisors for financial feasibility.

1998 RECOMMENDED CAPITAL IMPROVEMENTS MILWAUKEE COUNTY

Division 1442 - Mitchell Domes Renovation

Construction of the Mitchell Park Domes proceeded in phases until final completion in 1965. The Domes were designed using concepts which advanced state-of-the-art conservatory construction. Ideas developed from the construction of the Domes have been studied and utilized on other projects throughout the country. It is a unique structure that must be maintained for future generations to enjoy.

The Domes have required little annual maintenance in over 30 years of operation. However, they are now showing signs of age. A variety of deficiencies that affect functionality and operating costs have been identified. These deficiencies will only increase if maintenance is delayed.

In October, 1993 Graef, Anhalt, Scholemer & Associates Inc. (GAS) was retained by Milwaukee County to perform a structural condition study of the Mitchell Park Domes. The purpose of the study was to quantify the nature and extent of the deterioration, determine feasible methods for performing repair work and provide data necessary to develop a reasonable plan/schedule for doing the work.

On February 7, 1994, GAS presented a structural condition study of the Mitchell Park Domes. The recommended minimum maintenance repair program identified 2 major areas needing attention: (1) structural integrity and (2) functional deficiencies. The 1995 adopted appropriation was used to begin work on the Show Dome. An amount of \$500,000 was approved in the 1997 capital improvement budget to complete Phase II of the rehabilitation. In 1998, \$800,000 is recommended to complete the rehabilitation. The project may include:

- Glass Replacement
- Painting
- Air Handling Units
- Entrance Work
- Electrical
- Air Conditioning of the Lobby

DPW Staffing Plan

DPW staff will be used for overall project management. Specialized consultants may be used for some components of basic planning, design, and construction management as needed. Specialized consultants may be retained as needed for: archaeological surveying; soils/materials/environmental testing and assessments; construction surveying; specialized legal counsel through the Corporation Counsel; appraisers/negotiators; title search consultants, etc., as required to complete planning, design and construction.

**1998 RECOMMENDED CAPITAL IMPROVEMENTS
MILWAUKEE COUNTY**

Division 1450 - Cathedral Square Renovation

An appropriation of \$1,500,000 is recommended for 1998 for improvements to make Cathedral Square a downtown destination year round. One half of project costs would be paid through private funding.

A 16-foot wide serpentine ice path will run approximately 850 lineal feet through the park without disrupting existing park features and usage. This path will also function as a sidewalk through the non-winter months. Once constructed, the path will end the long periods of temporary ice rink equipment installation and removal, and will make major park restorations unnecessary. A permanent pavilion will house the refrigeration equipment, restrooms, concession area and ice grooming machine.

A new performance gazebo, located within the central plaza, will provide staging for music, weddings and a variety of outdoor events including the existing festivals the public has come to enjoy. Other amenities include new infrastructure, harp light fixtures, new concrete walkways, new park benches, and landscaping.

DPW Staffing Plan

The project is proposed as a private/public venture. Planning, design, bidding, contract award and construction contract administration will be shared responsibilities. Disadvantage Business Development staff will enforce the appropriate D.B.E. participation requirement for the County's share of the project cost.

MILWAUKEE COUNTY**

Division 1451 - Mitchel Boulevard Improvements

The 1998 recommended appropriation of \$100,000 would be used for the development of a master plan for this park area. This work will include usage and layout of park, traffic management and removal, relocation or reconfiguration of the existing road. This project may also include the planning, design and minor construction of implementation of initial phases of master plan and amenities. If appropriations remain after design activities are complete, some construction may be undertaken from the \$80,000 identified for basic planning and design.

DPW Staffing Plan

DPW staff will be used for overall project management. Specialized consultants may be used for some components of basic planning, design, and construction management as needed. Specialized consultants may be retained as needed for: archaeological surveying; soils/materials/environmental testing and assessments; construction surveying; specialized legal counsel through the Corporation Counsel; appraisers/negotiators; title search consultants, etc., as required to complete planning, design and construction.

**1998 RECOMMENDED CAPITAL IMPROVEMENTS
MILWAUKEE COUNTY**

Division 1505 - Brewer's Stadium Infrastructure

The recommendation for 1998 provides an additional \$6.0 million appropriation to continue project implementation under the same conditions as those established in the 1997 budget.

An appropriation of \$6.0 million was adopted for 1997 to provide initial financing for Milwaukee County's \$18.0 million share of Brewer's stadium infrastructure costs.

Payments were to be made to the Stadium District only for actual expenditures incurred by the District for Milwaukee County's share of project expenses.

It is anticipated that the Stadium infrastructure project will be considered a "regional project" for the purposes described in Wisconsin Statutes 67.05(7)(f) concerning the issuance of county bonds. Based on this regional project designation, authorization of bonds for this purpose will require a majority vote of the County Board of Supervisors.

DPW Staffing Plan

No DPW staffing plan is required.

1998 RECOMMENDED CAPITAL IMPROVEMENTS MILWAUKEE COUNTY

Division 1513 - McKinley Marina Redevelopment

An appropriation of \$265,000 is recommended for 1998 to complete A-D dock replacement. The McKinley Marina facility was constructed in its present form in 1965 and is owned and operated by Milwaukee County. While serving the County well over the past 30 years, the facility is aging. Damage to the facility occurs on a seasonal basis from both excessive waves and ice. Repair to dockage and related infrastructure would result in another short term fix without addressing the root cause of the problem.

In 1993, Baird & Associates studied the wave environment within the McKinley Marina with respect to the specific objective of replacement of dockage sections. The study also had a secondary objective to explore, conceptually, the potential expansion and improvements possible if the current wave environment is improved to accepted standards. The study proposed the construction of a breakwater within the existing McKinley Marina structures. A 1994 appropriation was used for the final design of an interior breakwater structure as well as for the determination of reasonable phasing of dockage and support. It was also used to begin breakwater construction and to design and begin construction of shore based support facilities.

A 1995 appropriation of \$5,000,000 was for the construction of the interior breakwater. Reimbursement revenue of \$3,000,000 (60% of the project), was requested from the Wisconsin Waterways Commission. The phasing for this project is projected as follows:

Phase One - 1994 - Breakwater design, and the design and construction of a restroom/shower facility.

Phase One - 1995 - 1996 - Breakwater construction.

Phase One - 1996 - Plans and specifications for the replacement of A-D dock with new dockage, and planning of shore based facilities.

Phase Two - 1997 - The replacement of A-D dock with new dockage. The 1997 adopted appropriation was \$1,500,000.

Phase Two - 1998 - Completion of A-D dock replacement.

Phase Two - 1999 - Planning and construction of shore based facilities including marina administration building, utilities, parking and roadways, and restroom/shower buildings.

Phase Three - 2000 - Design and construction of half of new dockage.

Phase Four - 2001 - Design and construction of half of new dockage, parking for the additional dockage.

DPW Staffing Plan

Basic planning and design for this project will be performed by Baird & Associates. DPW staff will be used for overall project management. Specialized consultants may be used for some components of basic planning, design, and construction management as needed. Specialized consultants may be retained as needed for: archaeological surveying; soils/materials/environmental testing and assessments; construction surveying; specialized legal counsel through the Corporation Counsel; appraisers/negotiators; title search consultants, etc., as required to complete planning, design and construction.

1998 RECOMMENDED CAPITAL IMPROVEMENTS MILWAUKEE COUNTY

Division 1557 - MPM Air Handling System Replacement

Phase I of this project was approved in the 1997 Milwaukee County Capital Improvement Budget in the amount of \$475,000 and the first years work is underway. The 1998 recommended appropriation of \$723,800 for Phase II of the project is required to complete the system replacement as planned.

The seven (7) air handling units used in the Museum's heating, ventilating and air conditioning system were installed in 1961 as part of the original building construction. These units service the collections storage areas, carpenter and paint shops, lecture hall, east and west exhibit floors and 4th, 5th and 6th floors. All units are in very poor condition and require excessive maintenance and repair costs. Drain pans and bottoms of units are rusted out, fan shafts and bearings are constantly being replaced, coils leak, automatic dampers do not seal, casings leak, and filter housings are in poor condition allowing air to bypass the filters.

Repair of these units could not be justified as they have long exceeded their life expectancy and the repair will cost nearly as much as replacing with new high efficiency units. In addition to being very old, noisy and corroded, they are not capable of supplying the balanced temperature and humidity levels required for the collections in storage and on display.

The main purpose of a museum and its environmental control system is to create an environment that will preserve the museum collections, but unfortunately because of the harsh Milwaukee winters and the hot humid summers and the shortcoming of the building envelope, maintenance of a stable humidity range is difficult. Therefore, it is important to upgrade the present inefficient air handling system to its maximum potential to achieve the best and most stable relative humidity possible.

The recommended air handling system would be equipped with reheat coils to provide the proper dehumidification along with new humidifiers for humidification. This project should span two years, 1997 - 1998, to allow the work to be done between fall and spring. The replaced units cooling area would be temporarily fed from an existing unit during the construction period.

An evaluation of the Museum's mechanical systems prepared by PSJ Engineering, Inc., consulting engineers for Milwaukee County DPW in 1995 strongly recommended the replacement of the above. The replacement cost estimated by PSJ Engineering was \$750,000 which would be required over two (2) years.

Jaspal Engineering Services, Inc. was hired in 1997 to provide consulting engineering services from design through construction of the project. Their schematic design report concludes that the construction cost estimate to replace/repair seven air handling units is \$1,198,800, which would be required over two (2) years.

The Museum HVAC air handling units are the original equipment and are about thirty-five years old. Besides being old, noisy and corroding they do not supply the balanced temperature and humidity control required in the Museum. A new system will be equipped with heat coils to provide the proper dehumidification along with humidification. There are seven air handling units supplying the Museum's eight floors. This project would span two years, 1997-1998, to allow the work to be done between fall and spring. (Per schematic design phase report from Jaspal Engineering Services, Inc.)

Asbestos abatement was found to be necessary and an additional \$40,000 has been added to the total project cost: \$5,000 consulting cost plus \$35,000 abatement cost.

**1998 RECOMMENDED CAPITAL IMPROVEMENTS
MILWAUKEE COUNTY**

Division 1576 - Zoo Winter Quarters Roof

An appropriation of \$186,000 is recommended for 1998 to construct a roof over the winter quarters exercise corridors. These areas must be snow and ice free in order to be utilized as exercise yards by the animals. Throughout much of the winter, this is not possible; and therefore, the animals must stay in their stalls with no exercise. By installing a roof to cover these areas, the animals could get their needed exercise. This project involves constructing a roof over the three exercise yards in winter quarters. Translucent panels, each 102 feet by 23 feet, will be installed.

DPW Staffing Plan

DPW staff will be used for overall project management. Specialized consultants may be used for some components of basic planning, design, and construction management as needed. Specialized consultants may be retained as needed for: archaeological surveying; soils/materials/environmental testing and assessments; construction surveying; specialized legal counsel through the Corporation Counsel; appraisers/negotiators; title search consultants, etc., as required to complete planning, design and construction.

**1998 RECOMMENDED CAPITAL IMPROVEMENTS
MILWAUKEE COUNTY**

Division 1585 - Zoo Infrastructure Improvements

Over the past years, the level of major maintenance appropriation in the operating budget has limited the Zoo's ability to preserve the proper level of equipment and building upkeep and preventive maintenance that is required for these facilities. The facilities serve approximately 1.35 million visitors a year and as a result require ongoing repair and maintenance. Most of the Zoo's buildings were built when the Zoo moved to its present site in 1960. These buildings are at a point in their life cycle where they require additional repair and maintenance.

A multi-year intensive infrastructure renovation project was started in 1990 to allow the Zoo to "catch-up" and bring its buildings and equipment to an acceptable level. In 1990, an appropriation of \$400,000 was approved for infrastructure improvements, \$500,000 was approved for 1991 and 1992, \$250,000 was approved for 1993 and 1994, \$457,200 was approved for 1995, \$430,500 was approved for 1996, and \$598,000 was approved in 1997. Specific infrastructure improvements recommended for 1998 total \$567,000 and include the following working elements:

Priority	Project Description	Appropriation
1	Pachyderm Boiler Replacement	\$120,000
2	Zoo Wide Asphaltting (exp)	\$100,000
3	Peck Welcome Center Siding	\$72,000
4	Roadway Lighting	\$100,000
5	Interior Walkway Lighting	\$60,000
6	New doors and Frames for Restrooms (exp)	\$15,000
7	Fire and Smoke Detectors and Alarms	\$100,000
	TOTAL	\$567,000

Several work elements recommended for 1998 are not eligible for long term debt financing. Projects totaling \$115,000 are recommended to be financed from property tax revenues.

1. Pachyderm Boiler Replacement - This project will replace the Pachyderm boiler in 1998. The 1997 budget allowed for replacement of Pachyderm and Giraffe boilers, but because of an emergency boiler replacement in the Feline building, replacement of the Pachyderm boiler was delayed. The Pachyderm boiler is 30 years old and replacement would improve energy efficiency and heating reliability.

2. Zoo Wide Asphaltting - The Zoo Wide Asphaltting is the continuation of a multi-year plan to get the Zoo pavement up to standards.

3. Peck Welcome Center Siding - The wood siding on the outside of the Peck Welcome Center is coming off. This project will involve replacing and re-nailing the siding and painting the outside trim.

4. Roadway Lighting - This is a continuation of the long term lighting project. It involves lighting the main entrance and exit of the Zoo, and also the parking lots. This project is necessary to insure the safety and security of both visitors and employees.

**1998 RECOMMENDED CAPITAL IMPROVEMENTS
MILWAUKEE COUNTY**

Division 1585 - Zoo Infrastructure Improvements

5. Interior Walkway Lighting - This project will involve lighting the walkways inside the park. It includes both replacement of existing lighting as well as installation of new fixtures. With increased night events at the Zoo, this project is necessary to insure the safety and security of both visitors and employees.

6. New Doors and Frames for Restrooms - The doors to the public restrooms are old, rusted out, and do not fit properly. This project would involve replacing these ten doors and frames throughout the Zoo.

7. Fire and Smoke Detectors and Alarms - This project is crucial to the safety of the animals, employees and visitors. The Zoo will put fire and smoke detectors and alarms into buildings which have none. It is high priority to install these detectors and alarms in the Primate building and the Aviary, followed by the Feline building, the Australian building and the Small Mammal building.

DPW Staffing Plan

DPW staff will be used for overall project management. Specialized consultants may be used for some components of basic planning, design, and construction management as needed. Specialized consultants may be retained as needed for: archaeological surveying; soils/materials/environmental testing and assessments; construction surveying; specialized legal counsel through the Corporation Counsel; appraisers/negotiators; title search consultants, etc., as required to complete planning, design and construction.

Division 1603 - Replace Fire Dampers

An appropriation of \$58,000 is recommended in 1998 for additional fire damper improvements. Inspection of the fire dampers in the ductwork that goes between the basement and main floor of CATC buildings D, E, and F indicates that the fire dampers are corroded, will not operate reliably, and are not repairable. They require replacement. These fire dampers were also found to not be installed to meet the Wisconsin building code and National Fire Protection Association Life Safety Code for hospital buildings.

A design for replacement of these dampers in the most cost effective manner has been developed. The design has been approved by the Wisconsin Department of Health and Social Services, Bureau of Quality Compliance.

This work is required to assure the safety of the patients, staff and visitors in these buildings, and for the continued licensing and occupancy of these buildings.

DPW Staffing Plan

DPW staff will be used for overall project management. Specialized consultants may be used for some components of basic planning, design, and construction management as needed. Specialized consultants may be retained as needed for: archaeological surveying; soils/materials/environmental testing and assessments; construction surveying; specialized legal counsel through the Corporation Counsel; appraisers/negotiators; title search consultants, etc., as required to complete planning, design and construction.

Division 1606 - Psychiatric Hospital - Repair Smoke & Fire Walls

An appropriation of \$72,000 is recommended for 1998 to repair smoke and fire walls. Preventative maintenance inspections revealed that the smoke/fire walls were not properly installed when the Psychiatric Hospital was constructed. Furthermore, over the past two decades, numerous penetrations have been made in smoke/fire walls during the installation of telephone wires and computer-related equipment. This places the building in violation of NFPA101. The Statement of Condition document provided to the Joint Commission on Accreditation of Hospitals and shared with the Health Care Financing Agency surveyors commits the Mental Health Division to the smoke/fire wall repairs no later than 1998.

DPW Staffing Plan

DPW staff will be used for overall project management. Specialized consultants may be used for some components of basic planning, design, and construction management as needed. Specialized consultants may be retained as needed for: archaeological surveying; soils/materials/environmental testing and assessments; construction surveying; specialized legal counsel through the Corporation Counsel; appraisers/negotiators; title search consultants, etc., as required to complete planning, design and construction.

**1998 RECOMMENDED CAPITAL IMPROVEMENTS
MILWAUKEE COUNTY**

Division 1628 - Juvenile Information Management Systems (JIMS)

The County Board of Supervisors on November 12, 1996, authorized a separate capital division number (1628) for the JIMS project. The purpose of JIMS is to provide a single database for the District Attorney and Department of Human Services juvenile case and history data.

The 1997 adopted budget directed that the JIMS workplan include:

- Working with other counties which are developing interfaces with CCAP
- Working with the state for compatibility with the child welfare automation
- Deciding on a software system platform by April, 1997

A management team has been authorized to coordinate resolution of the interfaces and outstanding issues, to manage the project budget and to track the installation plan. The recommended JIMS software is Canyon's Juvenile Court Activity Tracking system (JCATS), a PC based software package which will be customized for Milwaukee County in a client server environment on a network. The Canyon software product was selected because it can be modified to meet Milwaukee County's needs as defined by the "Requirements Definition Session" in August 1995; it appears comprehensive and user friendly and the user references were highly satisfactory.

The project cost estimates are as follows:

Canyon software (estimated in March, 1997)	\$ 550,000
Hardware costs (estimated in 1995),	1,435,300
Connectivity equipment (estimated in March, 1997)	<u>14,700</u>
	\$2,000,000

The management team was directed to verify that the project can be completed within the \$2,000,000 budget allocation. Therefore, it is anticipated that the software package and some of the hardware, i.e., file servers and communications equipment, will be purchased in 1997. The \$500,000 recommended for 1998 will provide the remaining PC compatible hardware to be purchased and installed in 1998.

DPW Staffing Plan

No DPW staffing plan required.

Division 1703 - Demolition of Doyne Hospital

An appropriation of \$700,000 is recommended for 1998 to relocate utilities for Sergeant Hall and to relocate potable water, electric power, steam and fire protection. Also included is planning for asbestos and mercury abatement. In 1999 and 2000 the asbestos and mercury will be removed from the buildings. In 2001 and 2002, this 9,451,000 cubic foot building will be demolished.

A separate appropriation will be required in future years for the relocation or replacement of radio and telephone equipment.

This project is required under the County/Froedtert Sales Agreement. This Agreement requires Froedtert to pay half of the demolition costs. Milwaukee County pays 100% of all environmental remediation.

Two components of the complex will be retained - "M" wing by Froedtert Hospital and "Eye Institute" by Medical College of Wisconsin. No costs are included to alter these two facilities.

DPW Staffing Plan

DPW staff will be used for overall project management. Specialized consultants may be used for some components of basic planning, design, and construction management as needed. Specialized consultants may be retained as needed for: archaeological surveying; soils/materials/environmental testing and assessments; construction surveying; specialized legal counsel through the Corporation Counsel; appraisers/negotiators; title search consultants, etc., as required to complete planning, design and construction.

Division 1759 - Courthouse, 5th Floor Bullpens

Bullpen facilities do not exist on the fifth floor of the Courthouse to service the four (4) courtrooms on the north half of the floor. An appropriation of \$125,000 is recommended for 1998 to plan and construct this improvement.

Construction would provide one bullpen each for male and female prisoners to service all four (4) courtrooms. Security screening would be provided and allow the courts to be used for felony trials.

DPW Staffing Plan

DPW staff will be used for overall project management. Specialized consultants may be used for some components of basic planning, design, and construction management as needed. Specialized consultants may be retained as needed for: archaeological surveying; soils/materials/environmental testing and assessments; construction surveying; specialized legal counsel through the Corporation Counsel; appraisers/negotiators; title search consultants, etc., as required to complete planning, design and construction.

Division 1764 - Courthouse Elevator Modernization

An appropriation of \$487,500 is recommended for 1998 to begin a project to modernize the Courthouse elevators and to meet code and ADA requirements, improve service including call response time and ride quality, improve reliability and reduce downtime. An appropriation of \$878,000 will be required to complete this project in 1999.

Modernization includes replacing the generators with silicone controlled rectifiers, replacing floor selectors with floor encoders, and replacing relay logic controllers with solid state logic and computer control. These modifications will eliminate thousands of moving parts with equipment that has few moving parts.

Present equipment has not been upgraded in twenty-seven (27) years with many existing parts being original equipment. Failure of obsolete parts has required that modifications be made to the equipment to keep it in service. This has had a large effect on performance; in general causing it to slow down. Overall elevator performance continues to degrade and require added maintenance.

The equipment age and condition is such that within the next years, major repairs will be required to remain operational with a consistent level of service. These repairs include:

- Undercutting and turning down all generators.
- Rebuilding or replacing governors.
- Turning all individual elevator cars.

Modernization will also provide Fireman's Service for the elevators which, provided separately, would cost \$150,000. Reliability would reduce maintenance costs. Performance upgrade would significantly reduce passenger waiting and traveling time.

DPW Staffing Plan

DPW staff will be used for overall project management. Specialized consultants may be used for some components of basic planning, design, and construction management as needed. Specialized consultants may be retained as needed for: archaeological surveying; soils/materials/environmental testing and assessments; construction surveying; specialized legal counsel through the Corporation Counsel; appraisers/negotiators; title search consultants, etc., as required to complete planning, design and construction.

Division 1784 - Safety Building - Roof Replacement

An appropriation of \$156,600 is recommended for 1998 for the third phase of a four year program for tuckpointing and replacement of the roof of the Safety Building. Numerous repairs failed to eliminate leaks and related problems. Prior funding replaced the northeast and southeast quarters of the building. Appropriations for 1998 will be used to replace the southwest quarter of the roof.

DPW Staffing Plan

DPW staff will be used for overall project management. Specialized consultants may be used for some components of basic planning, design, and construction management as needed. Specialized consultants may be retained as needed for: archaeological surveying; soils/materials/environmental testing and assessments; construction surveying; specialized legal counsel through the Corporation Counsel; appraisers/negotiators; title search consultants, etc., as required to complete planning, design and construction.

Division 1795 - Medical Examiner Laboratory Equipment Upgrade

It is necessary to replace/add the following pieces of equipment in an effort to upgrade outdated equipment and reduce the turnaround time for toxicology results as well as increase the overall efficiency of the Medical Examiner's toxicology laboratory. The equipment recommended for 1998 includes:

1. Hewlett Packard Series II 5890 GC Autosampler (100 sample capacity). An automatic sampler is necessary for the automated analysis of specimens run on the newly purchased Gas Chromatograph/Mass Spectrometer (GC/MS) equipment which is used for the analysis of drugs in biological specimens. With this piece of equipment, the analyst will be able to set up an analysis and begin a run thereby allowing the instrument to automatically sample, analyze, calculate results and produce a report without analyst intervention. This would free up an analyst for performance of other toxicological duties necessary in the laboratory. With an automatic sampler for the GC/MS equipment, analyses could be set up and run overnight, increasing the throughput of tests performed by the GC/MS. The GC/MS is presently used for all drug screen confirmations, blood drug screens, quantitations for cocaine, opiates, barbiturates and benzodiazepines, as well as additional testing awaiting to be implemented as part of the toxicology testing protocol. The addition of an automatic sampler to the GC/MS would increase the productivity of the toxicology lab by further reducing the turnaround time of testing conducted by the GC/MS since it would then be a completely automated system. A total of two autosamplers are recommended for both GC/MS's (the newly purchased one and the one which has been currently upgraded). The estimated cost for both autosamplers is \$20,100.
2. HPLC Computer Upgrade This upgrade will update the current operating system (Pascal, 1090/DAD) on this piece of equipment to DOS/Windows. This update will allow the HPLC to have a computer system compatible with GC/MS and the PC network which has been recently installed within the Medical Examiner's Office. The upgrade will enable the transfer of information from the HPLC instrument onto the new systems. The estimated cost for this upgrade is \$14,400.
3. Gas Chromatograph - Hewlett Packard Model 6890A GC This instrument is recommended to replace the current gas chromatograph (GC) purchased approximately ten years ago. The majority of blood quantitations are performed using this instrument. There are several advantages of the new GC instrumentation. The new instrument has electronic pressure control which allows the analyst to change flow rate in combination with temperature during a chromatographic run. The result is a better chromatographic resolution of drugs, shorter analysis time and increased sensitivity. The new system contains NPD detectors instead of FID detectors for increased analytic specificity as well as sensitivity. This will allow the detection of certain drugs such as antipsychotics which are not detected on the present GC at therapeutic concentrations. The new computer system supplied with the 6890 GC will be capable of automation as well as statistical analysis which now has to be done manually. The analyst will be able to set up an analysis and begin a run after which the instrument will automatically sample, analyze, calculate results and produce a report without analyst intervention. Maintenance on the new instrumentation is also less labor intensive. The replacement of this GC should increase efficiency and further help to reduce turnaround time of tests performed. The estimated cost for this piece of equipment with an autosampler is \$30,500.

**1998 RECOMMENDED CAPITAL IMPROVEMENTS
MILWAUKEE COUNTY**

Division 1796 - ME, Computer Upgrade

The 1998 recommended appropriation of \$50,000 will provide for the final phase of the computer upgrade project in the Medical Examiner's Office. The first phase is the purchase and installation of a personal computer network. The second phase is the purchase and installation of hardware and software to enable remote access to the Medical Examiner's network from the Fond du Lac County Satellite morgue facility and from the Racine County Medical Examiner's Office. These work elements will enable the department to conduct necessary autopsies. These phases also include the purchase of hardware and software necessary to enable the department's Systems Administrator and/or the Administrative Manager remote access to the network in order to remedy system problems during non-office hours and weekends and holidays as the computers are utilized 24 hours per day by staff members who must access the system to enter and retrieve case information.

The requested expenditure for this final phase of the ME computer upgrade project is for the development and installation of a modified medical examiner data base system. This software would be developed by outside consultants who have expertise in developing medical-related databases as well as past experience with the Medical Examiner's current database's system software (i.e. MUMPS) which is now considered outdated and inefficient. It should be noted that the current database program was developed approximately 20 years ago and was never updated to meet current trends and new technology. It has been determined by this office that an updated, custom-made database software will improve the case management function of this office which will improve the overall efficiency of the department.

The main purpose for recommending an upgrade of the current database system is the fact that the portion of the software involving the input of a narrative report is not user friendly in that it lacks a word processing format. The reports are currently entered onto pre-numbered lines and therefore involving many steps to make corrections, such as calling up the line number, etc. With the absence of a word processing program the entry of narrative reports has been very tedious and cumbersome resulting in many hours of overtime expended for forensic investigators who must enter all of their investigative reports into the system before leaving their assigned shift. The integration of a word processing system (i.e. Microsoft Word for Windows) into the medical examiner system database will reduce the current amount of overtime dollars spent in report writing.

It should also be noted that the current database program is generic and not customized to the Medical Examiner Office's actual investigative and reporting procedures - that there are many menus and screens that are not utilized as they do not apply to the customary functions of this department. With the current system it is also very difficult to obtain an immediate response for requested technical assistance when a problem arises with the software due to the fact that the owner of the software, who is not the original creator of the software, is stationed out of town (St. Louis, Missouri) and is unavailable during general office hours during which he assumes a full-time position in addition to supporting this software package.

MILWAUKEE COUNTY**

Division 1802 - ACC - Kitchen Renovation

An appropriation of \$448,600 is recommended to convert the existing food service kitchen (that presently prepares approximately 3,300 meals per day for the Franklin site) to a serving kitchen for the new Cook Chill Tray System.

The area has a number of small walk in coolers and one walk in freezer designed and installed when the House of Correction had 350 inmates. The dairy cooler must be renovated with a new cooling system and door. A walk in cooler of 300 sq. ft. is recommended with doors that will accept a standard skid of 48" x 42". Most of the existing coolers will need to be demolished and a new 300 sq. ft. cooler installed. Project elements also include a retherm oven and upgrading HVAC to code.

The dining area will be divided into two units with a blind servery and beverage station included in this part of the project. This work will enable the HOC to feed all units in the original complex in 1½ hours versus 2½ hours per meal which is the current time allotted. This will be much less disruptive to work projects, training projects and education projects. In addition, this will better utilize staff and vendor personnel.

DPW Staffing Plan

DPW staff will be used for overall project management. Specialized consultants may be used for some components of basic planning, design, and construction management as needed. Specialized consultants may be retained as needed for: archaeological surveying; soils/materials/environmental testing and assessments; construction surveying; specialized legal counsel through the Corporation Counsel; appraisers/negotiators; title search consultants, etc., as required to complete planning, design and construction.

MILWAUKEE COUNTY**

Division 1830 - Adult Correction Center - 600 Bed Men's Facility

An appropriation of \$10,228,500 is recommended for 1998 to continue the development of a 600 bed men's dormitory facility at the House of Correction. The 1996 adopted capital improvement budget originally included an appropriation of \$6,750,000 to begin planning/design and construction for a 600 bed men's dormitory facility at the House of Correction Adult Correctional Center (ACC). Subsequent to the adoption of the 1996 budget, expenditure appropriations for this project were reduced by \$2,860,000 to \$3,710,000 due to revised cash flow projections.

The adopted appropriation for 1997 provided \$11,600,000 to begin the construction of the new facility including a new kitchen, administrative offices, a receiving booking center, a gate house/visiting area and loading dock with secure shipping and receiving areas. Total project costs were originally estimated at \$24,989,000. However, subsequent to 1997 budget adoption, the County Board of Supervisors adopted Resolution File No. 97-13(a)(i) which increased total project cost estimates to \$28,089,000 based on the receipt of actual bids for phase 2 construction of the project. In addition, the County Board of Supervisors directed the Director of Public Works to work with the general contractor to perform a constructability review and identify alternative deducts for the project to possibly reduce total project construction costs without compromising the integrity of the project. The Director of Public Works is directed to report to the County Board in October, 1997, in conjunction with County Board budget deliberations on a revised cost estimate for the project. The current project cost estimate of \$27,728,000 is based on the transfer of \$111,000 of project appropriations to the House of Correction warehouse addition project and anticipates a \$250,000 reduction in overall project costs.

DPW Staffing Plan

DPW staff will be used for overall project management. Specialized consultants may be used for some components of basic planning, design, and construction management as needed. Specialized consultants may be retained as needed for: archaeological surveying; soils/materials/environmental testing and assessments; construction surveying; specialized legal counsel through the Corporation Counsel; appraisers/negotiators; title search consultants, etc., as required to complete planning, design and construction.

MILWAUKEE COUNTY**

Division 1834 - Roof Replacement - Garage/Print Shop/Pumphouse

An appropriation of \$133,200 is recommended for 1998 to replace roofs at the House of Correction. The roof on the garage and print shop has developed several leaks. These leaks are located in several areas and are causing damage to the metal decking and the contents inside. The print shop stores reams of paper and printing supplies. Damage to this area would be extremely expensive.

The pumphouse has several leaks that have caused serious damage to the plaster ceiling. In addition, radio communication equipment is housed in this building. This equipment services part of the Milwaukee County Emergency Communication System and Sheriff's Department Radio Communication System. If damage should occur in this area, repairs would be costly.

DPW Staffing Plan

DPW staff will be used for overall project management. Specialized consultants may be used for some components of basic planning, design, and construction management as needed. Specialized consultants may be retained as needed for: archaeological surveying; soils/materials/environmental testing and assessments; construction surveying; specialized legal counsel through the Corporation Counsel; appraisers/negotiators; title search consultants, etc., as required to complete planning, design and construction.

This Page Left Intentionally Blank.

1998 RECOMMENDED CAPITAL IMPROVEMENTS MILWAUKEE COUNTY

Division 1851 - Mobile Data System Infrastructure

An appropriation of \$694,500 is recommended for 1998 for the installation of a mobile data network for the Sheriff's Office and other County law enforcement agencies. The project represents the next logical phase in the gradual improvement in Milwaukee County public safety communications.

The Sheriff's Department and many suburban police agencies use mobile data terminals (MDTs) mounted in squad cars to perform routine wanted checks on individuals, property and vehicles. Well-planned use of this technology greatly enhances the delivery of public safety services at the county and local levels. Additionally, the use of mobile data systems greatly reduces workload on communications dispatchers, which would otherwise require additional staff to perform. Many suburban departments depend on a mobile data infrastructure to dispatch their squad cars by "automatically" sending emergency call information directly to squad cars.

Presently, all Sheriff's Department MDTs and many Milwaukee County suburban police MDTs utilize services of a mobile data infrastructure located in Waukesha County. The Sheriff's Department currently pays \$25.00 per month per device for this service. The Waukesha County system has become overloaded with data traffic, which drastically slows down system response time and reduces the overall effectiveness of mobile data technology. The Waukesha County system operators have no plans to upgrade their services to more modern technology and no plans to migrate their system to higher data transmission rates.

This project provides a very conservative approach to solve several system-related problems. It preserves all existing infrastructure, including all equipment currently installed in Milwaukee County and suburban patrol squads. It utilizes data transmission equipment presently owned by the Metropolitan Chiefs of Police Association. Most importantly, it provides a planned upgrade path for all municipal police agencies to permit the use of more efficient, high speed data transmissions. Such an upgrade path is an essential to managing change in mobile data technology, and fits well with the state's overall redesign of the statewide TIME system. Finally, aided dispatch data can be sent to and received from squad cars without active dispatcher intervention.

Project Cost Estimates and Reimbursement Revenue

Phase I implementation of Milwaukee County's mobile data infrastructure moves present MDTs off of Waukesha County's system, moves the current data transmitter to a new site and establishes data connections to a new message switch at a cost of \$415,000.

Phase II of the project is to install a high speed data layer at two sites and connect the Phase I data switch at a cost of \$160,000. Replacement equipment acquisition of mobile data computers is estimated at a cost of \$119,500.

The Wisconsin Department of Transportation has expressed significant interest in this project, since the WISDOT staff feels that it will enhance incident management efforts within southeastern Wisconsin. The Wisconsin Department of Transportation will provide \$300,000 in reimbursement revenue with the understanding that Milwaukee County would support the remainder of the project. In addition to Wisconsin DOT revenues, the Sheriff's Department anticipates using \$275,000 in Local Law Enforcement Block Grant funds for the implementation of this project.

DPW Staffing Plan

The Sheriff's technical management staff will provide project management and system design oversight for this project. Planning efforts will be coordinated with IMSD and the Milwaukee Metropolitan Chiefs of Police to minimize service interruptions during project construction.

1998 RECOMMENDED CAPITAL IMPROVEMENTS MILWAUKEE COUNTY

Division 1856 - Sheriff's Firing Range at House of Correction

The Milwaukee County Sheriff's Department is the second largest law enforcement agency in the State of Wisconsin. The level of firearms training for recruit and in service training has been forced to remain stagnant in the past five years due to the lack of a suitable firearms range. There have been Federal Appellate and Supreme Court decisions that have made it clear that increased competency in firearms training is required. By staying at the current level of training, the Department is falling behind in providing appropriate firearms training. The Department, with its nearly 600 sworn officers, currently has an indoor range in the Safety Building that can accommodate five officers at a time. This five person capacity was marginally adequate when built ten years ago when substantially fewer officers were on the job. With the current level of sworn officers it would be necessary to conduct nearly perpetual firearms training throughout the year to accommodate training requirements for all personnel.

The subject proposal consists of 100' wide x 300' long range surrounded by a 35' high fenced earth berm, a 1,000 sq. ft. support building with full basement and bathrooms, and a surface parking lot with utilities.

The proposed site is directly east of 68th Street behind the House of Correction.

This project is contingent upon U.S. Army Engineers participation to provide cut/fill grading. The benefit of this participation is estimated at a cost of \$235,000. Due to the limited time the U.S. Army Engineers is available (monthly training session) to perform the work, it is anticipated that project development could take several years to complete.

DPW Staffing Plan

Department of Public Works staff will perform most primary and administration functions on this project. However, some specialized sub-consultants will be hired for basic planning and design. Assigned DPW project managers will be Eriks Krumins (Architectural Projects) and Greg High (Engineering Projects).

Specialized consultants may be used for some components of basic planning, design, and construction management as needed. Specialized consultants may be retained as needed for: archaeological surveying; soils/materials/environmental testing and assessments; construction surveying; specialized legal counsel through the Corporation Counsel; appraisers/negotiators; title search consultants, etc., as required to complete planning, design and construction.

**1998 RECOMMENDED CAPITAL IMPROVEMENTS
MILWAUKEE COUNTY**

Division 1858 - Fleet Equipment Acquisition

The 1998 recommended appropriation for fleet equipment totals \$3,000,000 in new and replacement equipment. The 1998 recommended budget includes 129 replacement items at a cost of \$2,949,000. Three new vehicles are recommended for the Sheriff's Department for new parking checkers at a cost of \$51,000. A listing of equipment recommended for 1998 is included on the following pages.

Recommended financing for 1998 includes \$121,000 of passenger facility charges revenue for replacement items identified for the airport. The balance of 1998 recommended financing requires the issuance of general obligation debt. However, it is again recommended that a portion of debt issued in 1998 for equipment acquisition costs be structured over a shorter time period to better match the expected useful life of the targeted items. Debt financing for automobiles and light trucks will be structured over 4 years instead of the 15.5 years anticipated for other capital improvements. Based on this recommendation, \$1,224,500 for equipment acquisition would be structured as short term debt within a larger 1998 corporate purpose general obligation bond issue.

The DPW Fleet department will also continue a program initiated in 1997 to charge user departments for the actual cost of acquiring and maintaining selected automobiles and light trucks. This program effectively rewards user department that provide good care for fleet vehicles.

DPW Staffing Plan

No DPW staffing plan is required.

1998 RECOMMENDED CAPITAL IMPROVEMENTS MILWAUKEE COUNTY

Division 1859 - DPW Fleet Facilities Infrastructure Program

An appropriation of \$103,700 is recommended for 1998 to begin a facilities infrastructure program for DPW fleet buildings. The department has identified several building components which need upgrading at a total cost of \$875,000 including \$13,700 for capitalized interest. The recommended appropriation for 1998 will be used for the highest priority items identified by the fleet department. In addition, remaining appropriations included in the 1997 Adopted Capital Improvement Budget available in Division 1859 are authorized to be used as part of the DPW Fleet Facilities Infrastructure Program. The following project elements are eligible for replacement under this program.

Air Exchangers Replacement

The Fleet Maintenance Garage has 15 heating and ventilating air exchangers to control temperature and air quality in the building.

The air exchange units are 29 years old and have exceeded their useful life. Four of these units are no longer repairable and must be replaced to control carbon monoxide in the building. The remaining units will need replacement soon, with two years, per condition assessments by facilities management. The total cost of air exchange replacement is estimated at \$540,000.

Overhead Door Replacement

Ten of the sixteen fleet overhead garage doors are in high use locations. The doors are 30 years old and have exceeded their expected useful service life. The ten doors have become very unreliable and, because most of the panels and mechanisms must be replaced, very costly to repair.

The overhead doors are large. The cost to replace each door is approximately \$16,800. The total estimate for ten doors is \$168,000.

Walkin Door Replacement

The thirty original walkin service doors at the Fleet Maintenance main garage and the ten service doors at the Foreman's Building were replaced between 1982 and 1984. Those wooden doors have not been serviced or maintained over the years causing total deterioration. Several doors are completely rotted, and the old steel door frames are rusted through, along with the hinges and door plates. An examination by Facilities Management personnel confirms this request for immediate replacement. Emergency replacement will be necessary, due to the deplorable condition of these doors. Security is being breached by not providing adequate protection for Fleet property along with property occupied by the Highway Department, Parks Department and the Sheriff's Department.

Replacing wooden doors with galvanized steel doors and galvanized door frames would secure the buildings and extend the useful life of the facility. New closures, hinges and some lock mechanisms would also have to be replaced. The \$52,000 total cost would cover replacement for all forty doors at \$1,300 per galvanized steel door and door frame.

Car Wash

The present car wash was installed in 1981. This system was expected to have a useful life of ten years. The Fleet car wash has been fully depreciated for several years, and now has had frequent break downs. The brushes not only scratch the new vulnerable paint finishes on cars, but also dent some of the vehicles. Parts are no longer available, and must be custom manufactured. It is not cost effective to wash a vehicle, only to have it sent to the body shop for repair. A new "touchless" environmentally friendly unit is needed to replace the old one.

**1998 RECOMMENDED CAPITAL IMPROVEMENTS
MILWAUKEE COUNTY**

Division 1859 - DPW Fleet Facilities Infrastructure Program

A brushless, no touch automatic design cleans with a jet type spray that achieves superior cleaning while eliminating the danger of scratching the new paint finishes. It also has an environmental advantage of minimizing consumable waste, while the water reclamation system creates 100% wash water reuse, that results in lower water demand. A stainless steel monoframe construction designed for strength and longevity also reduces corrosion for better overall quality and vehicle security. The cost of this project element is estimated at \$102,000.

DPW Staffing Plan

DPW staff will be used for overall project management. Specialized consultants may be used for some components of basic planning, design, and construction management as needed. Specialized consultants may be retained as needed for: archaeological surveying; soils/materials/environmental testing and assessments; construction surveying; specialized legal counsel through the Corporation Counsel; appraisers/negotiators; title search consultants, etc., as required to complete planning, design and construction.

1998 RECOMMENDED CAPITAL IMPROVEMENTS MILWAUKEE COUNTY

Division 1860 - Countywide Handicapped Accessibility Program

The recommended appropriation of \$100,000 for 1998 will provide for facility accessibility requirements in compliance with the Americans with Disabilities Act (ADA) for all County facilities. The recommended appropriation for 1998 will be used to complete the highest priority projects established by the Commission on Handicapped and Disabled Persons.

The Americans With Disabilities Act (ADA) which became law on June 26, 1990, is a comprehensive anti-discrimination mandate for persons with disabilities providing civil rights protection comparable to those in force for women and minorities. Title II of ADA mandated Public entities such as the County to comply with "program accessibility" requirements of the Act after June 26, 1992. Simply stated this means that a Public entity must ensure that the operation of each service, program and activity is operated so that each, when viewed in its entirety, is readily accessible to and useable by persons with disabilities. The Act further states that Public entities that employ 50 or more persons and elect to undertake physical changes to their facilities to achieve "program accessibility" must formulate a "transition plan" to accomplish the changes. These changes must be in conformance with the Uniform Federal Accessibility Standards or the ADA Accessibility Guidelines, to be accomplished by January 26, 1995.

For almost two decades, Milwaukee County has made handicapped accessibility improvements to its facilities under the guidelines of the previous Federal Accessibility Law: Section 504 of "The Rehabilitation Act of 1973". These improvements were done in response to two major handicapped accessibility studies conducted on Countywide facilities: The Flad Report was done in 1979 to determine compliance with the requirements of Section 504 of the "Rehabilitation Act of 1973", and; the Pfaller, Herbst Report, "Handicapped Building Accessibility Study," was done in 1984 as an update to the earlier study.

ADA extends modification requirements of the Rehabilitation Act to all public facilities and programs whether they receive federal assistance or not, and further requires completion of the modifications by January 26, 1995. In response to this mandate, Milwaukee County's Office on Persons with Disabilities conducted a county-wide evaluation of programs and services accessibility in 1992. This self-evaluation provided additional data on modifications to be added to the original 1984 county-wide study titled "Handicapped Building Accessibility Study". These three studies and two decades of ongoing accessibility improvements form the basis for Milwaukee County's continuing efforts to comply with applicable law. The County Commission on Handicapped and Disabled Persons reviewed the modifications recommended in the previous studies and the County-wide "self-evaluations" and determined those considered to be priority #1.

DPW Staffing Plan

DPW staff will be used for overall project management. Specialized consultants may be used for some components of basic planning, design, and construction management as needed. Specialized consultants may be retained as needed for: archaeological surveying; soils/materials/environmental testing and assessments; construction surveying; specialized legal counsel through the Corporation Counsel; appraisers/negotiators; title search consultants, etc., as required to complete planning, design and construction.

MILWAUKEE COUNTY**

Division 1861 - Trunked Radio Simulcast System

The 1998 capital recommendation for enhancement to the 800 MHZ radio system will provide for the completion of several tasks not covered in prior years. These components include:

1	System Enhancements	\$515,000
2	Establish an inventory of critical spare parts	\$25,000
3	Add radios for Highway Department	\$325,000
4	Capitalized Interest	\$32,200
	Component Totals	\$897,200

The 1998 recommended budget establishes additional simulcast sites to increase coverage to portable radios to address concerns raised by the Sheriff's Department.

DPW Staffing Plan

No DPW staffing plan required.

MILWAUKEE COUNTY**

Division 1865 - Brownfields Redevelopment

An appropriation of \$500,000 is recommended for 1998 to continue a program for brownfields redevelopment in Milwaukee County. The Economic Development Division in conjunction with Milwaukee County municipalities would acquire, remediate and redevelop contaminated industrial and commercial sites in Milwaukee County. The emphasis for the 1998 program will be the 30th Street industrial corridor, West Milwaukee and other areas of Milwaukee County.

The State may provide grant reimbursement for Brownfield projects to Milwaukee County. This account could be used for the local match for individual projects that have been approved by the County Board.

Property tax revenues will be used for 1998 project financing because potential soil contamination cleanup costs are not eligible to be debt financed. In addition, land acquisition costs incurred in contemplation of a future sale may be considered a private activity under federal law for the purpose of issuing tax exempt bonds.

DPW Staffing Plan

The DPW project manager responsible for this project is Gary Mick.

Division 1870 - County Special Assessments

The 1998 recommended appropriation of \$225,000 will be used to pay special assessments levied on the County by local municipalities. The special assessment are typically for the installation of improvements such as, street pavement, curb & gutter, sidewalks, watermain, and sewers in lands abutting County lands or facilities.

DPW Staffing Plan

Project management will be coordinated by DPW staff person Robert F. Doren.

1998 RECOMMENDED CAPITAL IMPROVEMENTS MILWAUKEE COUNTY

Division 1871 - Marcus Center Chiller Replacement

An appropriation of \$1,050,000 is recommended for 1998 to replace chillers at the Marcus Center for the Performing Arts. The Marcus Center is currently served by two 320-ton Trane PCV-3F chillers. Each chiller contains approximately 800 pounds of r-11 and operates at a rated efficiency of 0.92 kilowatt per ton (kW/ton). Installed in 1969, the chillers have been in service for 28 years, and are at the end of their useful life. The American Society of Heating, Refrigerating and Air Conditioning Engineers (ASHRAE) lists the average life of a centrifugal chiller at 23 years.

In August, 1996 Johnson Controls indicated that they could not guarantee that the chillers would operate without a major breakdown during the 1997 cooling season due to their age and condition.

As early as 1991, Haning, Sikkema, Heaton indicated that the chillers will shortly reach the median service life for chillers of this type.

The chillers should be replaced for the following reasons:

1. Equipment efficiency. New chillers can be purchased which are substantially more efficient than the existing ones, saving in operational costs.
2. The chillers are of an age where an overhaul is advisable to maintain chiller reliability. Replacement prior to this overhaul will eliminate the costs associated with it.
3. Production of CFC's was phased out at the end of 1995. The life of available stocks, as required by the existing chillers, is uncertain.
4. Currently, zebra mussels and dirt are being brought into the condensers. Chiller condensers, are cleaned every 2 weeks. Reworking the strainer and filter system, and adding Lakos type water separator will help increase the time required between condenser cleanings.

Also, during the last few years, the existing cooling load on the Marcus Center has changed. The existing stone has been replaced with a new limestone, and insulation has been added. In addition, new space has been added on the north side of the building, and a new east addition was completed in the fall of 1996.

DPW Staffing Plan

DPW staff will be used for overall project management. Specialized consultants may be used for some components of basic planning, design, and construction management as needed. Specialized consultants may be retained as needed for: archaeological surveying; soils/materials/environmental testing and assessments; construction surveying; specialized legal counsel through the Corporation Counsel; appraisers/negotiators; title search consultants, etc., as required to complete planning, design and construction.

MILWAUKEE COUNTY**

Division 1872 - War Memorial Facilities Improvements- Memorial Hall

An appropriation of \$79,000 is recommended for 1998 to plan the renovation of Memorial Hall and the 3rd and 4th floor rental spaces. These areas will be the main source of revenue for the War Memorial. Memorial Hall especially is in desperate need of repair.

Preliminary studies indicate a broad spectrum of changes that will improve the facility and the ability of the staff to market the entire facility to businesses and groups of many sizes and special needs.

Funds in 1998 will be used for architectural and engineering services. These services will include working out details with the War Memorial staff to finalize a plan for renovation.

Capital appropriations will be requested in 1999 for actual construction. Timing is very crucial for the renovation of the War Memorial rental areas. The Milwaukee Art Museum expansion will bring potential customers to the War Memorial and it is important that a state-of-the-art facility be available to meet the needs of current and new renters.

The Memorial Hall renovation is part of the Kahler Grunau Report. This renovation has been expanded and moved up in priority since the original report was authored.

DPW Staffing Plan

DPW staff will be used for overall project management. Specialized consultants may be used for some components of basic planning, design, and construction management as needed. Specialized consultants may be retained as needed for: archaeological surveying; soils/materials/environmental testing and assessments; construction surveying; specialized legal counsel through the Corporation Counsel; appraisers/negotiators; title search consultants, etc., as required to complete planning, design and construction.

**1998 RECOMMENDED CAPITAL IMPROVEMENTS
MILWAUKEE COUNTY**

Division 1873 - ABACUS/Year 2000 Transition

An appropriation of \$6,600,000 is recommended for 1998 to continue implementation of ABACUS/Year 2000 Transition. Recommended financing for 1998 includes \$553,300 in property tax revenues for items identified as costs not eligible for long term financing. In addition, personal computer acquisition costs of \$1,031,700 are recommended to be financed on a shorter term basis than the proposed 15.5 year corporate purpose bond issue. Personal computers would be financed over four years. The \$5,015,000 balance of project costs will be financed over 15.5 years. Personal computers will be treated as an asset of IMSD. The balance of project implementation costs are expected to be treated as a general fund asset of Milwaukee County.

In 1996, \$1.0 million was appropriated to begin exploring the County's options for replacement of the County's accounting (FIRMS) and budget preparation systems. A major problem with the current financial systems, besides the systems being over 15 years old, was that they were not designed to handle the transition to the Year 2000. A Management Committee was created with representatives from the County Executive's Office, the County Board, the Public Policy Forum and County Departments to oversee the project. Given the significant impact replacement of the County's financial systems has on many of the networks, equipment needs and other systems, such as payroll/human resources, the Management Committee recommended and received approval to complete a Five Year Strategic Plan for Technology.

The plan was developed with the assistance of an outside contractor, Grant Thornton LLP, and covered all major components of County technology strategy for networks, equipment, and standards. The Strategic Plan incorporated timetables for replacement of major computer systems in the County, such as the financial systems and payroll/human resources development, projections for compliance with Year 2000 requirements, developed estimates for the upgrade of County networks and equipment, and developed county-wide standards. The Information Management Services Division was designated as the County lead for implementation of the Five Year Strategic Plan by the County Board in May, 1997.

1998 Recommended Budget

The 1998 recommended budget for ABACUS/Year 200 Transition also incorporates the categories and recommendations of the Five Year Strategic Plan for Technology. The total project includes estimates for implementation of the Strategic Plan through the Year 2000 of a total cost of \$18,683,000. The total project is divided into the six components of the Five Year Strategic Plan for Technology:

	IMSD Operating Budget
A. Define County-wide standards	
B. Year 2000 Compliance	\$750,000
C. Establish the Technical Infrastructure	\$7,525,168
D. Implement a Human Resource/Payroll Solution	\$3,399,500
E. Implement a Financial System Solution	\$6,388,532
F. Establish an Information Infrastructure	<u>\$619,800</u>
Total	\$18,683,000

1998 RECOMMENDED CAPITAL IMPROVEMENTS MILWAUKEE COUNTY

Division 1873 - ABACUS/Year 2000 Transition

The purpose of the Five Year Strategic Plan for Technology is to provide a guideline for the County to follow for:

- the development of its major systems, such as the financial system, human resource/payroll system and others,
- establishing standards for equipment and networks in creating an improved technical infrastructure and
- establishing software/training standards for improvement of the County's information infrastructure.

The 1998 recommended budget begins the implementation of the Five Year Strategic Plan and focuses on three major areas:

- The replacement for the FIRMS financial and budget preparation systems (ABACUS project), including the purchase of software, equipment, networks, installation and project implementation costs,
- Replacement of the County mainframe with an OS/390 CMOS Enterprise Server and
- The continuation of the upgrade for the payroll/human resource system and other existing systems to be Year 2000 compliant.

The 1998 recommended capital budget includes \$6,600,000 for these three major areas. Management of the ABACUS project continues under the direction of the Management Committee formed in 1996 and the role of the Management Committee has been expanded to include oversight of other areas. The 1998 recommended budget focuses primarily on funding necessary for the ABACUS project. This amount in addition to the \$2,367,000 included in the 1996 and 1997 adopted budgets includes funds for:

- Purchase of the financial system software from American Management System and Budgeting Technology, Inc. which was awarded under a competitive bid in July, 1997,
- Selection of a new Fleet Maintenance System for DPW,
- Implementation services for both the AMS and BTI contractors and a twelve member County ABACUS project team,
- Purchase of a OS/390 CMOS enterprise server to replace the County mainframe,
- Upgrading approximately half of the County's networks,
- Purchasing additional or replacement desktop personal computers necessary for the implementation of the ABACUS project, and
- Training County staff for the new financial system and office automation improvements.

The ABACUS project is scheduled to implement a new budget preparation system in the second quarter of 1998 and the remainder of the financial system during the first quarter of 1999.

**1998 RECOMMENDED CAPITAL IMPROVEMENTS

Division 1877 - Register of Deeds - Optical Imaging System

An appropriation of \$450,000 is recommended for 1998 to implement a Register of Deeds optical imaging system.

Pursuant to Section 59.43 of the Wisconsin Statutes, the Register of Deeds is required to record real estate documents. Part of the recording process is the creation of a permanent public copy of each document. Since 1962, microfilm has been the medium used to comply with this directive. Though reliable and archival, microfilm has many problems. Among them are storage space, production time, and user access.

These problems are addressed by optical imaging. The central concept of this technology is the creation of computer-stored images from source documents via digital scanning. Instant verification, minuscule storage requirements and unlimited local and remote access solve the difficulties associated with microfilm.

Twenty Wisconsin counties, including Brown, Dane, Racine and Kenosha have embarked on this technology. All the counties have expressed satisfaction with their systems.

The Register of Deeds has recently communicated with potential vendors. The cost of an optical imaging system is estimated at \$450,000. MCAMLIS has allocated \$100,000 for this venture and various title insurance companies have pledged \$50,000 to provide initial financing for the project.

DPW Staffing Plan

No DPW staffing plan is required.

MILWAUKEE COUNTY**

Division 1882 - Fleet Central Garage Roof

The roof of the Fleet Maintenance main shop garage, consisting of 202,286 square feet, was originally constructed in 1967 and is in need of replacement.

Consultants, engineers and plumbing designers, examined the roof in 1992. They found that, the sub-layers of the roof cannot be easily examined for existing condition. The original construction was a "dead level", zero slope roof. The roof drains originally installed were few in number and with a "restricted flow" feature due to minimum sized storm sewer in street.

Since that time, research and experience has shown that a positive roof slope is needed with additional drains for a satisfactory asphalt built-up roof life.

This lack of positive slope and roof deck deflection below drain levels cause 2½ inch deep water and/or ice build up in certain areas for several days after a storm. This has aged the roof membrane, causing massive leaks and unsafe roof conditions. It should be noted that the weight of snow on the roof during winter, also deteriorates sections of the roof making them candidates for collapse.

In addition to normal re-roofing, improvements proposed are, the creation of positive roof slope by the addition of sloped rigid perlite insulation and additional restricted flow drains. Due to the sloped roof surface and additional drains, the roof would be dry within 20 - 22 hours after the heaviest rainstorm.

In 1991 and 1992, five roof leaks occurred and in each instance, repair time has been extended because of weather conditions and contractor delays. In 1993 leakage damage occurred on three occasions. In 1994, leakage damage took place once. In 1995 and 1996 there were three incidents each year of water damage. Subsurface damage which is not easily seen, may also be happening. The cost of this may show up later when the roof is replaced at which time damage may be assessed.

Leakage, safety, slow repair response, and multi-year length of restoration are all factors suggesting commencement of timely roof replacement, rather than emergency restoration.

DPW Staffing Plan

DPW staff will be used for overall project management. Specialized consultants may be used for some components of basic planning, design, and construction management as needed. Specialized consultants may be retained as needed for: archaeological surveying; soils/materials/environmental testing and assessments; construction surveying; specialized legal counsel through the Corporation Counsel; appraisers/negotiators; title search consultants, etc., as required to complete planning, design and construction.

MILWAUKEE COUNTY**

Division 1885 - War Memorial - South Entrance ADA Improvements

The Milwaukee Art Museum is in the process of planning a substantial addition to the south of the existing facility. Pending approvals, construction is scheduled to begin during the winter of 1997/98, with construction completed at the end of 1999. The new addition will connect to the existing War Memorial/Art Museum at the south entrance to the War Memorial.

As currently configured, handicapped accessibility is available from the exterior of the existing south entrance to the Art Museum ticket office with the help of a wheelchair lift, which is not reliable and provides cumbersome access. However, after that point, Art Museum patrons must use the freight elevator with staff help to access the various floors of the museum. This condition does not meet ADA requirements, and must eventually be rectified. It is recommended that this ADA renovation be planned and constructed in conjunction with the new Art Museum addition project.

Funding for planning and some hazardous material abatement is recommended for 1998. Construction funding will be requested for 1999.

DPW Staffing Plan

DPW staff will be used for overall project management. Specialized consultants may be used for some components of basic planning, design, and construction management as needed. Specialized consultants may be retained as needed for: archaeological surveying; soils/materials/environmental testing and assessments; construction surveying; specialized legal counsel through the Corporation Counsel; appraisers/negotiators; title search consultants, etc., as required to complete planning, design and construction.

**1998 RECOMMENDED CAPITAL IMPROVEMENTS
MILWAUKEE COUNTY**

Division 1895 - County-wide Revolving Engineering Account

The establishment of a county-wide revolving engineering account is recommended for 1998 to allow the Department of Public Works greater flexibility in conducting preliminary planing and engineering for proposed capital improvements.

Currently, a revolving engineering account exists for the County Grounds projects (Division 1701). It is recommended that remaining appropriations in this account be transferred to Division 1895 and that this account be used on a county-wide basis. On September 26, 1997, the current available balance for this account was \$39,435.

Adoption of this recommendation will allow the Department of Public Works to accelerate project implementation between initial budget adoption and the January 1 effective date for new appropriations, and to develop more detailed cost estimates for new proposals when required.

DPW Staffing Plan

DPW staff will be used for overall project management. Specialized consultants may be used for some components of basic planning, design, and construction management as needed. Specialized consultants may be retained as needed for: archaeological surveying; soils/materials/environmental testing and assessments; construction surveying; specialized legal counsel through the Corporation Counsel; appraisers/negotiators; title search consultants, etc., as required to complete planning, design and construction.
