

Children's Hospital Point of Entry for - Code Infection: EBOLA

- Children's hospital has designated their loading dock as the point of entry for **all high risk Ebola patients**
 - All ambulances transporting a high risk Ebola patient will be directed to go Children's loading dock to transfer care of the patient. This includes:
 - Milwaukee County EMS Units
 - Milwaukee County Privates
 - Out of County EMS Units
 - Interfaculty Transports
 - EMS units transporting high risk patients to FMLH will still use the ambulance bay
- When a unit calls in report of a high risk patient going to CHW, follow your Code Infection: EBOLA protocol and direct the unit to transport the patient to the loading dock and not the ambulance bay.
 - Assist the unit with routing if needed.
