OFFICE OF EMERGENCY MANAGEMENT (OEM)

MISSION:

OEM is in the business of urban resiliency, the protection of lives and property through exacting communications to decision-makers and through the total coordination of resources, on-location and on-time.

OEM strives for a 'whole community' approach, meaning collaborative stewardship in government and in private entities, thereby allowing civic society to bounce back from the shocks of our increasingly complex culture.

Milwaukee County
OFFICE OF EMERGENCY MANAGEMENT

VISION:

OEM's responsibility is to improve the resiliency of our urban core in Milwaukee County. This involves local education and tools which increase a community's self-reliability.

Resiliency is additionally dependent on excellence in first responder services which OEM is tackling in the form of joint academic ventures, cooperative data-sharing, and creating a command center environment.

This center, with a forensic intelligence focus, would be a comingled resource of accurate communications and intelligence spanning 2-1-1, 3-1-1, 5-1-1, 8-1-1, and 9-1-1 data allowing better predictions and ergo, targeted responses and preparedness efforts.
