

What Is Access Clinic?

The Access Clinic is a behavioral health clinic for Milwaukee County residents who are uninsured.

A person coming to Access Clinic can expect to see a clinician for a needs assessment and will be connected with therapy or a prescriber for medications to manage mental health symptoms. Access Clinic has prescribers on-site to assist people as quickly as possible with medication needs, but patients are then connected to long-term, outpatient settings in the community which are contracted by the Behavioral Health Division.

We have two locations; one on the near southside in Milwaukee and one at the Mental Health Complex.

We are here to help you.

What is MHOP?

MHOP stands for Mental Health Outpatient Package. Milwaukee County partners with seven clinics in the area to provide outpatient therapy to individuals without insurance.

We recognize that not all mental health needs are solved by medications. This service provides an opportunity for Milwaukee County residents without insurance to have access to a regular therapist.

The average session length is 1 hour, weekly, for about eight weeks.

The creation of MHOP was to take another step to fully integrated, holistic mental health care.

To access MHOP services, you can go to either of the **two** Access Clinic locations.
