Mission Statement

- To promote and maintain the highest professional standards in the field of death investigation;
- To provide timely, accurate and legally defensible determinations as to the cause and manner of death;
- To enhance public health and safety through reducing the incidence of preventable deaths;
- To foster public awareness and support the advancement of professional medical and legal education; and,
- To protect the interests of deceased individuals, their loved ones, and the communities we serve.

The Purpose and Function of the Medical Examiner's Office

The Milwaukee County Medical Examiner's Office is charged with investigating and determining the cause, circumstances and manner in each case of sudden, unexpected or unusual death. Additional activities important to the public health and safety function of the Medical Examiner include:

- Detect tuberculosis, hepatitis, meningitis and other infectious diseases to assist in prevention against the spread of communicable disease;
- Coordinate with other public health and safety organizations and entities to reduce the incidence of preventable deaths;
- Participate as part of the governmental response team for emergency management services;
- Issue death certificates for deaths investigated by this office;
- Conduct cremation investigations for all Milwaukee County deaths in which cremation is selected as a means of disposition;
- Maintain a forensic toxicology (drug) laboratory for testing blood and body fluid specimens for the presence of drugs, poisons or other toxic agents; and,
- Host an annual seminar designed to educate pathologists, coroners, attorneys, law enforcement officers, and other health professionals on a variety of topics related to forensic science.

Department Authority

Section 979.01 Wisconsin Statutes requires that any person having knowledge of an unexplained, unusual, or suspicious death, or a death due to homicide, suicide, or a death following an accident, whether the injury is or is not the primary cause of death, a death without a physician in attendance within 30 days preceding death, a death in which the attending physician refuses to sign the death certificate, etc., shall report such death to the medical examiner for investigation. Investigations are conducted by the office for certifying cause and manner of death. Furthermore, if a death appears to be a result of unlawful means, it is reported to the District Attorney pursuant to §979.04 (2), as well as the appropriate local law enforcement agency, for further investigation, and possible criminal prosecution.

Additional investigative responsibilities described in §979.10 direct the medical examiner to view the remains, and make an investigation into the cause and manner of all deaths in which the next-of-kin selected cremation for disposition.

Milwaukee County Medical Examiner Annual Report 2015

Glossary of Terms

| | |
|-------------------|---|
| Cremation | A means for the disposition of human remains after death, consisting of the application of heat to reduce the remains to ashes. A document authorizing the cremation of human remains is required under the law prior to cremation. The medical examiner/coroner for the county in which the cremation is to be performed must authorize such disposition upon review and investigation of the death. |
| Death certificate | A document signed by a physician, medical examiner or coroner testifying that the circumstances and cause of death as contained in the certificate are verified by the certifier. This certification process is used for legal and evidentiary purposes in matters pertaining to the estate of the decedent, as well as for public health and vital records purposes. |
| Drug | Medication or substance other than food used for therapeutic or other (recreational) use. A <i>therapeutic</i> drug is a medication or substance used in the prevention, diagnosis or treatment of a disease or symptom. A <i>recreational</i> drug is a substance used for its personal stimulation, euphoria or mood-altering properties (includes alcohol). |
| Gender | The sex designation, whether male or female, of the individual being described |
| Jurisdiction | The medical examiner accepts jurisdiction on all deaths properly reported to this office under WI Statute §979, as described in the Department Authority section of this report. Not all deaths occurring in Milwaukee County are “reportable deaths” within the jurisdiction of the medical examiner. |
| Manner of death | The classification of circumstances surrounding the cause of death of an individual, as determined by the medical examiner and certified on the death certificate. The standard manners of death as used in death certification include: natural, accident, suicide, homicide and undetermined. |
| Natural | The cause of death is a physical disease of the body, ultimately resulting in cessation of bodily functions. |
| Accident | The cause of death is an unintentional injury, caused by a condition or agent external to the decedent. |
| Suicide | The death is the result of a purposeful action toward the intentional taking of one’s own life. |

Milwaukee County Medical Examiner Annual Report 2015

Glossary of Terms

| | |
|--------------|--|
| Homicide | The death is the result of an intentional harmful act of another person, whether or not that action was intended to cause death. |
| Undetermined | A death is certified as undetermined when, after complete investigation, insufficient evidence remains to make a complete determination as to one of the above classifications. |
| Poison | A “toxin” is a substance that can harm an organism by other than mechanical means. “Poison” simply means “too much,” as even therapeutically useful substances can cause harm when given at high levels. |
| Race | The ethnic category to which an individual is assigned for vital statistics reporting. The categories used in this report are: African American, Asian/Pacific Islander, Caucasian, Eastern Indian, Hispanic, Multi-racial, and Native American. |
| Trauma NOS | This is trauma with a cause that is not otherwise specified or does not meet the definitions of other categories. |

Deaths in Milwaukee County in 2015 (by Manner of Death)

| MANNER | NUMBER | PERCENTAGE |
|---------------|---------------|-------------------|
| Natural | 774 | 45% |
| Accident | 654 | 38% |
| Suicide | 99 | 6% |
| Homicide | 161 | 10% |
| Undetermined | 23 | 1% |

| | |
|-----------------------------------|-------|
| ME CASES JURISDICTION ACCEPTED | 1,711 |
| CREMATION ONLY INVESTIGATIONS | 2,776 |
| JURISDICTION WAIVED | 855 |
| NON-REPORTABLE/OTHER JURISDICTION | 394 |
| CASES NOT REPORTED | 2,353 |
| TOTAL DEATHS, MILWAUKEE COUNTY | 8,089 |

There were 8,089 deaths in Milwaukee County in calendar year 2015, as generated utilizing the Wisconsin Department of Health, Vital Statistics division's Mortality module.

<https://www.dhs.wisconsin.gov/wish/mortality/broad-form.htm>

Of the 1,711 cases where jurisdiction was accepted, 952 cases were autopsied (56%). Additionally, 16 external exams (10 external exam only and 6 external exam with toxicology), 12 private autopsies for suspected CJD cases, 2 fetal tissue and 2 unknown bone examinations were performed. The Milwaukee County Medical Examiner's office does not perform partial autopsies or allow hospitals to perform autopsies under its jurisdiction. Autopsies were not performed in deaths where the reported circumstances, scene investigation, medical history or external examination offered information sufficient to certify the death. All suicides, homicides and most accidental deaths underwent autopsy.

Milwaukee County Medical Examiner Annual Report 2015

Deaths by Manner: Natural

The majority of deaths certified by the Milwaukee County Medical Examiner's Office in 2015 were classified as "natural" deaths. Natural deaths come under jurisdiction of the medical examiner when they are sudden or unexpected, when the decedent has not been under the care of a health care provider, or when there are suspicious circumstances surrounding the death.

In 2015, 774 deaths were certified as natural and comprised 45% of all deaths investigated, compared to 893 (50%) in 2014. The most frequent cause of natural death across all age groups was cardiovascular with 541 deaths (70%). The majority of these deaths occurred in the 56-74 year age group (275) and in men (356 males versus 185 females).

Milwaukee County Medical Examiner Annual Report 2015

Deaths by Manner: Accident

The second most common manner classification in 2015 was “accident.” Accidental death refers to unintentional deaths resulting from interaction with a “hostile environment” such as drowning or fire.

In 2015, 654 deaths were certified as accidents and comprised 38% of all deaths investigated, compared to 664 (37%) in 2014. The two most frequent causes of accidental death across all age groups were drug-related with 256 deaths (39%) and falls with 213 (33%) deaths.

Milwaukee County Medical Examiner Annual Report 2015

Deaths by Manner: Suicide

Suicide is defined as the intentional taking of one's own life. A total of 99 (6%) deaths were certified as suicide by the Milwaukee County Medical Examiner's Office in the year 2015. This is very similar to 2014 which had 96 (5%) deaths classified as suicide. Asphyxia and gunshot injury related suicides represented more than half of all suicides with 37% and 32% respectively. 72% of all suicides certified in 2015 were male.

Milwaukee County Medical Examiner Annual Report 2015

Deaths by Manner: Homicide

For the purpose of this report, homicide is defined as death resulting from injuries inflicted by another person regardless of intent. The medical examiner determination of homicide rests solely on the medical evidence present at the time of the investigation, and is independent of the legal definition, which often includes the concept of intent.

The Milwaukee County Medical Examiner's Office had 161 cases certified as homicides which comprised nearly 10% of all deaths investigated in 2015. This is a 56% increase from 2014 wherein 103 (6%) deaths were certified as homicides. Male gunshot injury homicides far exceeded all other combinations of categories and gender with 132 male deaths representing 82% of all homicide deaths.

Milwaukee County Medical Examiner Annual Report 2015

Deaths by Manner: Undetermined

A death certified as undetermined is one in which manner cannot be determined based on a full investigation. Circumstances in which the investigation may not reveal adequate findings include those in which there is a time delay between death and discovery of the body, or where there is no information as to the source or nature of the injuries or medical condition of the decedent prior to death. A death is certified as undetermined only after a complete investigation is concluded, including autopsy. One percent of all deaths were certified as undetermined in Milwaukee County in 2015.

2015 Undetermined Deaths By Age and Sex

| Death Type/Age Category | | <1 | 6 - 12 | 18 - 25 | 26 - 55 | 56 - 74 | 75+ | Total |
|---------------------------------|--------|----|--------|---------|---------|---------|-----|-------|
| Asphyxia | Male | 0 | 1 | 0 | 0 | 0 | 0 | 1 |
| | Total | 0 | 1 | 0 | 0 | 0 | 0 | 1 |
| Blunt Force Trauma | Male | 0 | 0 | 0 | 1 | 1 | 0 | 2 |
| | Total | 0 | 0 | 0 | 1 | 1 | 0 | 2 |

| Total | | 8 | 1 | 2 | 7 | 4 | 1 | 23 |

Milwaukee County Medical Examiner Annual Report 2015

Medical Examiner Activities

In addition to conducting death scene investigations, cremation investigations, autopsies and toxicology studies, a number of other activities are performed by medical examiner personnel as part of the death investigation process. These functions include:

- Death certification;
- Testifying at legal proceedings;
- Death notifications to next-of-kin;
- Body identification;
- Protection and legal disposition of property belonging to decedents;
- Burial arrangements for unclaimed bodies;
- Disinterment authorization; and,
- Lectures to law enforcement personnel, medical students, etc.

The statutory duties and responsibilities of the office are performed by the Medical Examiner, a licensed physician trained and board-certified in forensic pathology. Four full-time forensic pathologists, two toxicologists, three forensic chemists, a staff of twelve forensic investigators, as well as additional clerical, autopsy, and managerial personnel support the medical examiner function. A forensic pathology fellowship program through the Medical College of Wisconsin trains one to two pathologists annually in forensic pathology through the Medical Examiner's Office. In addition, two post-doctoral fellows in toxicology and therapeutic drug monitoring participate in a two-year training program through this office in conjunction with the Medical College of Wisconsin. The Medical Examiner's office gains the knowledge and expertise in modern toxicology methods through these fellowship programs without incurring any support costs, as these toxicology fellowship positions are funded through the Medical College of Wisconsin Department of Pathology.

Professional consultants in the specialized fields of forensic odontology (dentistry), forensic radiology, forensic anthropology, adult and pediatric cardiac pathology, and forensic neuropathology provide additional support. An autopsy facility and toxicology laboratory provide a secure facility for staff, visitors and evidence entrusted to our care.

The release and dissemination of medical and other information collected or retained by this office is another important activity. Autopsy reports, investigative reports and related data from individual investigations are provided to interested parties such as families, community-based health care providers, insurers, law enforcement, attorneys and others for their use. In addition, agencies such as the Drug Enforcement Administration, City of Milwaukee Health Department, Consumer Product Safety Commission, and Wisconsin Department of Transportation also receive periodic information from this office to further the data analysis and reporting of deaths investigated in Milwaukee County.

Milwaukee County Medical Examiner Annual Report 2015
