

DEPARTMENT OF ADMINISTRATIVE SERVICES  
*Milwaukee County*

**TO:** All Interested Consultants  
**SUBJECT:** Addendum 4 - Climate Action 2050 Plan RFP  
**PROJECT NUMBER:** WY062502  
**DATE:** May 17, 2022

**INTRODUCTION**

This addendum (“Addendum 4”) is issued to further modify, explain or correct the *Request for Proposals - Milwaukee County Climate Action 2050 Plan*, dated April 22, 2022, and is hereby made part of the RFP.

**Proposers must acknowledge receipt of Addendum 4 in their proposals, or the proposals may be rejected.**

CLARIFICATION

(questions received via email to [sustainability@milwaukeecountywi.gov](mailto:sustainability@milwaukeecountywi.gov))

**Q9: Given the County’s use of the Milwaukee County Land Information Office (MCLIO) VertiGIS platform, does the County intend to publish, maintain, or otherwise utilize its current GIS platform to represent the deliverables of the Climate Action 2050 Plan? Has the County used alternative GIS platforms to represent data from individual projects other than its publicly available platform, and would the County be open to hosting the deliverables of the Climate Action 2050 Plan on an independent GIS platform, whether publicly or privately?**

Milwaukee County has a full Esri suite to support the GIS data that is needed to support, present and distribute information related to the Climate Action 2050 Plan. The County also utilizes VertiGIS and will use this GIS platform, if needed for the project. Any additional GIS platforms or tools needed for this project shall be the responsibility of the consultant.

**Q10. How do you envision this plan affecting local policy in Milwaukee County municipalities?**

As described in Addendum 1, Milwaukee County wants the Climate Action 2050 Plan to have positive impacts (“co-benefits”) on the community, including local municipalities. Thus, engagement of municipalities is an important component of the plan development.

**Q11. How do you anticipate communicating and collaborating with representatives from County municipalities outside of the City of Milwaukee?**

As described in the RFP (see Task 2), the selected consultant will develop the *Stakeholder Engagement Plan* and is responsible for its implementation. Consultants should indicate in their proposals how they will develop a strategy for communicating and collaborating with local municipalities and other project stakeholders. The Sustainability Director and Sustainability Task Force will provide input on stakeholder engagement at the project kickoff meeting.

Sincerely,

Gordie Bennett  
Sustainability Director

Milwaukee County
