Department Mission:

The Milwaukee County Treasurer’s Office provides prompt, high-quality services to sustain the overall operation of County government. For the benefit of Milwaukee County’s citizens, the Treasurer’s Office provides these services by efficiently carrying out the functions of cash receipt and disbursement, property tax services, and investments.

Department Description:

The Office of the Treasurer has five distinct functions:

Banking Services - This function is responsible for county wide banking functions, internet banking access, bank account and money management, and account reconciliation.

Cash Receipting and Check Distribution - This function is responsible for check printing, processing and distribution. Services in this area include the certifying of retirement check issues, processing check replacements for lost, stolen, or voided items, and the publication of unclaimed monies.

Accounts Receivable - This function is responsible for county-wide accounts receivable.

Accounts receivable was created in 2020 as the result of a recommendation by the executive sponsor of the county-wide Enterprise Resource Planning (ERP) system. The ERP recommended the accommodation of a new centralized accounts receivable function for Milwaukee County. The Office of the Treasurer agreed to house this function due to the similarities between accounts receivable functions and operational duties currently performed.

Property Tax Collection - This function is responsible for the collection of delinquent property taxes for the 18 municipalities located in Milwaukee County. The County purchases delinquent tax receivables from municipalities, then collects outstanding balances and administers foreclosure proceedings.

Investment Management - This function is responsible for long and short-term investment of operating funds not needed for immediate use. To maximize investment revenue, the County sets the investment policy and independent contracted investment advisors directly manage the funds.
