

**Mobile Integrated Healthcare
PREVENTATIVE HEALTH CARE RECOMMENDATIONS**

POLICY

This policy outlines the minimal procedures during a Mobile Integrated Health (MIH) encounter for a patient for preventative healthcare recommendations.

PURPOSE

Provide baseline guidance for the MIH provider on management of patients who require additional recommendations on preventative healthcare recommendations.

BASIC MEDICAL CARE

Reference and apply all applicable OEM standards of care. Identify, treat, and attempt to stabilize any client/patient who is identified as acutely ill. Activate the municipal transport service if indicated. The most relevant standards of care are as follows:

- Universal Care
- Universal Precautions

SOCIAL DETERMINANTS OF HEALTH (SDOH)

Reference and apply all applicable patient assessment screens in addition to OEM MIH Standards of Care. An emphasis should be placed on the following SDOH:

- Access to healthcare
- Understanding condition and care plan

PROVIDER SAFETY AND PPE CONSIDERATIONS

Perform an initial assessment of the outside of the residence before reaching the threshold or main entry point to the residence. The provider will don all PPE before entering the residence. Only bring the necessary equipment into the residence to prevent cross-contamination.

STANDARD OF CARE

1. Apply General MIH Operational Guidelines
2. Establish and review patient's previous vaccination and preventative care medical history
3. Review the patient's age and medical conditions while actively reviewing the Centers for Disease Control and Prevention (CDC) Immunization Schedule specific to the patient's age
4. Review the U.S. Preventive Services Task Force (USPSTF) Level A & B Recommendations specific to the patient's concern, medical history, or age
5. Provide the patient with information on the recommendations of the CDC and or USPSTF
6. Refer the patient to their medical provider for vaccination or preventative screening OR a pharmacist for vaccination next best steps
7. Offer point-of-care testing for glucose or blood pressure if indicated
