

**NARCAN LEAVE BEHIND
Operational Policy**

POLICY

Leave Behind Naloxone (LBN) is a critical component to patient care in our community. Many EMS agencies within Milwaukee County currently perform LBN programs in various forms. LBN requires EMS Medical Direction standardization per DHS regulations.

PROCEDURE

1. Agencies will obtain or create LBN kits intended for layperson use as available.
2. LBN will be distributed to EMS units as available.
3. System providers may provide a LBN kit to patients and/or bystanders involved in suspected opioid use disorder (OUD) cases or others at risk of OUD at provider discretion.
4. Distribution of LBN kits *at an EMS incident* must be documented in the ePCR using the 'Leave Behind Narcan Kit' procedure tab. Providers should document who LBN was left with (patient, friend, family, law enforcement, responsible adult (i.e. caregiver, or other) in the appropriate field.
5. Distribution of LBN kits *outside of an EMS incident* must be documented using the below QR code, including details of date and time of distribution and general demographics of recipient.
6. Naloxone from regular EMS supply shall not be distributed to patients or bystanders.
