Paramedic

Helping Others in Extraordinary Times

Milwaukee County is focused on becoming the healthiest county in Wisconsin by focusing on health equity. The Office of Emergency Management – EMS Division is setting the foundation to be able to detect and respond to the community through our Community Oriented Regional EMS (CORE) Team.

The CORE Team is currently assisting with COVID-19 testing efforts in community sites and also has the ability to respond to suspected outbreak areas. Should vaccinations become available, the CORE team will assist in mass administration.

The CORE Team also serves as an EMS response team for the following venues: Fiserv Forum, Milwaukee County Zoo and UWM Panthers Arena for the Milwaukee Admirals.

Future efforts will focus on community outreach and education such as CPR/AED, Stop the Bleed, etc.
